SESSION [#] READOUT — [TITLE]

[CLIENT CODE] ([CLIENT INITIALS], [AGE], [EP]%) | [CASE REF] | [FEE] | [DATE] [TIME] | [MODALITY] | ~[DURATION] min | **READ TOP TO BOTTOM — THERAPIST ONLY**

5 FIXES BAKED IN: Orange markers (FIX #1-5) are NON-SKIPPABLE structural elements from the S4 performance review. They are embedded at the exact moment they must execute. Do NOT defer. Do NOT skip. These are the fundamentals that turn strong technique into measurable, defensible clinical practice.

PHASE 1: GREETING ~30 sec

SAY: "Hey [NAME], good to see you. How are you doing tonight?"

DO: Let them settle. Match energy. Observe posture, eye contact, tone vs last session.

DO NOT START THE CHECK-IN YET. Baselines come FIRST. Before they tell you about their week. Before anything clinical. The greeting is 30 seconds of human connection, then immediately to Phase 2.

PHASE 2: SMART BASELINES — 90 SECONDS, ZERO EXCUSES ~90 sec

FIX #1 - BASELINES: Collect these BEFORE the check-in. BEFORE the client tells you about their week. BEFORE anything clinical. This takes 90 seconds. There is no valid reason to defer.

SAY: "Before we get into anything tonight, I need 90 seconds for baseline numbers. Same six areas. Just how you feel right now. No right or wrong."

ASK: "Self-esteem: 1 = no value in who I am, 10 = confident and worthy."

RECORD: SE: ___/10

ASK: "Assertiveness: 1 = cannot speak up, 10 = comfortably express needs."

RECORD: AS: ___/10

ASK: "Anxiety (inverted): 1 = runs the show, 10 = calm and in control."

RECORD: AX: ___/10

ASK: "Trust: 1 = guard always up, 10 = open with chosen people."

RECORD: TR: ___/10

ASK: "Comfort in own skin: 1 = deeply uncomfortable, 10 = at ease."

RECORD: CO: ___/10

ASK: "Influence of the past: 1 = controls everything, 10 = aware but free."

RECORD: PI: ___/10

RECORD: BASELINES: SE___ AS___ AX___ TR___ CO___ PI___

SAY: "Good. Those are your numbers. We will compare them next session."

Compare to prior session baselines. Note any movement >1 point. If this is the first collection, note that in the record.

PHASE 3: FADE RATE CHECK ~60 sec

FIX #5 - FADE RATE: Track the durability of the previous session's intervention. This is your efficacy metric. Ask BEFORE the open check-in so you get the clean data before the conversation colors it.

ASK: "The [KEY FEELING/OUTCOME FROM LAST SESSION] — where is it right now on a 1-10 scale? Is it still there?"

RECORD: Last session key outcome: ___. Current rating: ___/10.

ASK: "If it shifted, when did you first notice? What was happening when it shifted?"

RECORD: Fade onset: day ___ of ___. Trigger for fade: ___. Fade rate vs prior session: faster / same / slower.

COMPARE: S2 protector energy faded at ~10 days. S4 "more complete" faded at ___ days. If longer = subconscious-level work is more durable than conscious-level. If same = need deeper trance or more repetition.

PHASE 4: CHECK-IN — NOW THE CLIENT TALKS ~5-8 min

SAY: "Now tell me about your week. How has it been since our last session?"

DO: NOW let them talk. 3-5 min. Listen for: emotional shifts, triggering events, homework compliance, dreams, anchor usage, group behavior changes. Do NOT rush.

If they completed homework (recording, pre-sleep practice, journal), reference specific items. If not: "What made it difficult?" (barriers, not resistance).

RECORD: Homework compliance: ___. Key events this week: ___. Dreams: ___. Anchor used: Y/N. Group experience: ___.

PHASE 5: SESSION BRIDGE — WHAT WE ARE DOING TONIGHT ~3 min

Adapt this to the specific session. Connect last session's outcome to tonight's work. Frame what will happen. Set expectations. Get consent.

SAY: "[BRIDGE FROM LAST SESSION TO TONIGHT'S WORK. FRAME THE TECHNIQUE. SET EXPECTATIONS.]"

SAY: "You are always in control. Right index finger at any point — I stop. Sound good?"

DO: Wait for verbal confirmation.

PHASE 6: RECORDING NOTICE ~30 sec

START RECORDING NOW.

SAY: "I am starting the recording now. You signed the consent — you are comfortable?"

DO: Wait for verbal consent. If declined: proceed without, note in checklist.

PHASE 7: INDUCTION ~7 min

Use the ESTABLISHED induction for this client. Repetition = association. Do NOT vary for variety. Only change if shifting therapeutic direction.

SAY: [INSERT CLIENT-SPECIFIC INDUCTION HERE]

PHASE 8: DEEPENING ~5-7 min

SAY: [INSERT CLIENT-SPECIFIC DEEPENING HERE: countdown, staircase, progressive relaxation, etc.]

PHASE 9: DEPTH VERIFICATION ~15 sec

FIX #2 - DEPTH CHECK: Check trance depth AFTER deepening and BEFORE any therapeutic work. This calibrates everything that follows. Takes 15 seconds.

SAY: **OPTION A (Self-report):** "On a scale of zero to ten, where ten is the deepest, most relaxed state you have ever experienced, where are you right now? You do not need to speak. Just hold up fingers."

SAY: **OPTION B (Arm catalepsy):** "Your right arm is becoming very rigid. Stiff. Like a steel bar. The more you try to bend it, the stiffer it becomes. Try to bend it now."

RECORD: Depth: ___/10 (self-report) OR arm held: Y/N. Compare to prior session depth: deeper / same / shallower.

If depth < 5: add another deepening round (reactional x2 or additional staircase) before proceeding to therapeutic work. If depth > 7: proceed confidently — subconscious access confirmed.

PHASES 10+: THERAPEUTIC WORK session-specific

Insert session-specific therapeutic phases here. Each phase should be marked as CORE (must deliver) or GATED (deliver only if time/capacity).

MARK EACH PHASE:
CORE = must deliver, non-negotiable. If you skip a CORE phase, document why in reconciliation.
GATED = deliver only if client has capacity and time remains. Skipping is acceptable and expected — document the gate reason.

[Example structure for a multi-phase session:]

RECONCILE: Phase 10: [TECHNIQUE] — CORE / GATED — Delivered: [ ] Skipped: [ ] Reason: ___

RECONCILE: Phase 11: [TECHNIQUE] — CORE / GATED — Delivered: [ ] Skipped: [ ] Reason: ___

RECONCILE: Phase 12: [TECHNIQUE] — CORE / GATED — Delivered: [ ] Skipped: [ ] Reason: ___

RECONCILE: Phase 13: [TECHNIQUE] — CORE / GATED — Delivered: [ ] Skipped: [ ] Reason: ___

RECONCILE: Phase 14: [TECHNIQUE] — CORE / GATED — Delivered: [ ] Skipped: [ ] Reason: ___

PHASE [N-2]: ANCHOR + POST-HYPNOTIC + SEAL ~3-5 min

SAY: [INSERT COMPOUND ANCHOR + POST-HYPNOTIC SUGGESTIONS + PHS SEAL]

PHASE [N-1]: COUNT OUT ~3 min

SAY: "Zero. Close the door to the subconscious. Seal in every positive suggestion. Block all negatives."

SAY: "One. Feel your body. The surface beneath you. Two. Fingers move. Toes wiggle. Three. Halfway. Refreshed. Clear-headed. Four. More alert. Sounds. Light. Five. Eyes open. Wide awake. Fully alert. Welcome back."

STOP RECORDING.

DO: Give time. Smile. Water. Let them orient.

PHASE [N]: DEBRIEF — FEEL / SETTLE / HOMEWORK / SAFETY / STOP

~7 min

FIX #3 - DEBRIEF BOUNDARY: After deep trance work, the debrief is EXACTLY: Feel → Settle → Homework → Safety → Goodbye. NO technique previews. NO "next time we might do X." NO education. Everything else goes in the email.

ASK: "How do you feel?"

DO: Give time. Let them find words. Do NOT prompt with specific emotions. Do NOT ask leading questions.

ASK: "What stood out? What did you notice?"

RECORD: First feeling: ___. What stood out: ___. Key quote (verbatim): ___.

SAY: "Good. Do not try to analyze it right now. Let it settle. Your subconscious is processing."

STOP HERE if the client reported a strong emotional shift. Do NOT add education, technique previews, or future session framing. Let the work settle. Put the education in the post-session email.

SAY: **HOMEWORK:** "[NUMBER] things for the week."

SAY: [LIST HOMEWORK ITEMS]

ASK: "Can you do those [NUMBER] things?"

DO: Wait for verbal commitment.

SAY: **SAFETY:** "If anything feels overwhelming: anchor first. Physiological sigh. Email me: jeeth@vrishihypno.com, 24-hour response. If urgent: 988. 24/7. You are not alone."

SAY: "Thank you for trusting me with this, [NAME]."

SESSION ENDS HERE. Close the Zoom. Do NOT add "next time we might do cord cutting" or any technique preview. That goes in the email.

POST-SESSION: READOUT RECONCILIATION

~2 min (IMMEDIATELY AFTER)

FIX #4 - RECONCILIATION: Do this IMMEDIATELY after closing Zoom. Before you stand up. Before you check your phone. Open this readout and mark every phase. 2 minutes.

GO THROUGH EVERY PHASE WITH A PEN:

RECONCILE: Phase 1: Greeting — Delivered: [ ]

RECONCILE: Phase 2: SMART Baselines — Delivered: [ ] Values: SE___ AS___ AX___ TR___ CO___ PI___

RECONCILE: Phase 3: Fade Rate Check — Delivered: [ ] Last outcome rating: ___/10. Fade day: ___

RECONCILE: Phase 4: Check-In — Delivered: [ ]

RECONCILE: Phase 5: Session Bridge — Delivered: [ ]

RECONCILE: Phase 6: Recording — Started: [ ] Stopped: [ ]

RECONCILE: Phase 7: Induction — Delivered: [ ]

RECONCILE: Phase 8: Deepening — Delivered: [ ]

RECONCILE: Phase 9: Depth Verification — Delivered: [ ] Depth: ___/10

RECONCILE: [Phase 10+: Mark each therapeutic phase delivered/skipped/reason]

RECONCILE: Anchor + PHS + Seal — Delivered: [ ]

RECONCILE: Count Out — Delivered: [ ]

RECONCILE: Debrief — Delivered: [ ] Boundary held (no previews): [ ]

FOR ANY PHASE MARKED "SKIPPED": Write ONE sentence explaining why. "Client at capacity after reparenting" = valid. "Ran out of time" = valid. No reason documented = NOT valid.

RECORD: Phases delivered: ___/___ total. Phases skipped: ___. All skip reasons documented: Y/N.

POST-SESSION CHECKLIST

WITHIN 24 HOURS

RECORD: 1. SOAP notes (incl. verbatim client quotes): [ ]

RECORD: 2. SMART baselines recorded (from Phase 2): [ ]

RECORD: 3. Fade rate data recorded (from Phase 3): [ ]

RECORD: 4. Depth score recorded (from Phase 9): [ ]

RECORD: 5. Readout reconciliation completed (above): [ ]

RECORD: 6. Key clinical data (new disclosures, breakthroughs, concerns): [ ]

RECORD: 7. Save + send recording to client: [ ]

RECORD: 8. Create + send AVS (after-visit summary): [ ]

RECORD: 9. Create + send post-session email (homework + next session preview goes HERE not in debrief): [ ]

RECORD: 10. CCH hours logged to HMI: [ ]

RECORD: 11. Next session decision documented: [ ]

RECORD: 12. Client data / memory files updated: [ ]

RECORD: 13. Portal updated (cases.json journey_plan): [ ]
