

SESSION 1 PREP SHEET: 24-STEP KAPPASINIAN MASTER

TM-002 (T.M., 22) | Wed Oct 8, 6:00 PM PST | Zoom | TRAUMA-001 | THERAPIST ONLY

BEFORE SESSION: Confirm SB 577 + Recording Consent are SIGNED. Childhood trauma client — complete ALL 6 screening questions before any trance work. If active psychiatric care, anti-psychotic meds, or suicidal ideation: REFER, do not proceed.

PRE-SESSION CHECKLIST

- ☐ SB 577 + Recording Consent signed?
- ☐ Review presenting issue + 6 themes (below)
- ☐ 36-question suggestibility test ready
- ☐ Screening questions reviewed (6 mandatory)
- ☐ L.O.V.E. intake structure reviewed
- ☐ Theory of Mind circle diagram ready to draw/show
- ☐ Zoom audio/video tested
- ☐ Recording software ready (start at Step 15)
- ☐ Notepad for EP scoring + screening answers
- ☐ Timer for induction + PHS verify timing
- ☐ Master script open on second monitor (902 lines)
- ☐ CCH log form ready for hours tracking

CLIENT PROFILE

Case	TM-002 (TRAUMA-001)	Age	22	Fee	Pro bono (CSP)
Referral	HMI Community Service Program	Prior therapy	Psychotherapy ("helped a ton")	Preference	Male therapist
EP	TBD (Session 1)	VAK	TBD	Presenting	Childhood trauma → 6 themes below

PRESENTING ISSUES (CLIENT'S OWN WORDS)

"I have some issues with **letting go of past traumatic experiences...** I've tried traditional psychotherapy, which has helped a ton, but I am still looking to resolve complicated feelings around **self-esteem, confidence, assertiveness**, and generally to **feel comfortable in my own skin**. I have issues **letting go** and **trusting people** close to me. My **anxiety still runs the show** sometimes, and I want to **become more open and less hypervigilant**."

6-THEME ISSUE MAP

#	THEME	CLIENT'S LANGUAGE	APPROACH
1	Childhood trauma	"past traumatic experiences from young kid"	Core wound — root of all other symptoms
2	Self-esteem	"comfortable in my own skin"	Core belief reframe
3	Confidence / assertiveness	"confidence, assertiveness"	Assertive voice installation
4	Trust	"trusting people close to me"	Circle of trust, boundary gate
5	Anxiety / hypervigilance	"anxiety runs the show", "hypervigilant"	Dial-down, nervous system recalibration
6	Letting go	"issues letting go"	Release ritual, safe container

24-STEP SESSION FLOW (MASTER SCRIPT REFERENCE)

#	STEP	TIME	KEY NOTES
1	Warm-up	2-3m	Human conversation first. Match his energy. Be direct but warm.
2	L.O.V.E. Intake	10-15m	Open-ended → closed-ended anchors. Body awareness Q. Expectations check (Melton).
3	Co-create plan	3m	6-8 session arc overview. Ask: "What would you prioritize?"
4	Critical screening	5-10m	6 mandatory Qs. CSP supervision disclosure. Get verbal acknowledgment.
5	Pre-induction speech	3-5m	14 points: natural state, not sleep, in control, "do with" not "do to", cooperative.
6	Theory of Mind	5m	Circle model. 88/12. Critical mind filter. "I work with 88%, you with 12%."
7	Suggestibility test	5-10m	36 Qs + finger-spread demo. Score EP. Announce result.
8	Physiological changes	1m	"You'll notice changes. I'll notice before you do." Eyelid flutter = stage 1.
9	Consent + safety	2m	Exit signal (right index finger). Explicit verbal consent. "Not sleep, focused relaxation."
10	Arm-raising induction	5-8m	Physical: power words, elbow-press, magnetic pull. Emotional: inferential, misdirection.
11	5-0 count + PHS	2m	"Safely and comfortably" added to PHS. 5=beginning, 3=emotional calm, 0=Deep Sleep.
12	Hand-to-forehead	2m	Physical EP only. Marble fusion, brief challenge.
13	Reactional x2	2m	Only 2 cycles (trauma). "Open eyes. Deep Sleep. Twice as deep."
14	Heavy/Light	2m	OPTIONAL. Physical only. Sand bag + helium balloons.
15	Progressive relaxation	5m	START RECORDING HERE. Full body scan. Delta pacing. "Outside sounds cannot disturb."
16	Staircase (20 steps)	3m	Well-lit, sturdy handrails. "Twice as deep" at 17, 12, 7. Safe OPEN destination (no walls).
17	Safe space + anchor	5m	Client designs NEW room (not childhood). 5 senses. Ideomotor nod. Anchor: triple-fire.
18	Post-hypnotic suggestion	1m	"Unexpected moments of calm." Dreams = processing. Gap between trigger and reaction.
19	Count out	2m	"Shut the door to block negatives." Gentle. Body awareness. NOT rapid.
20	PHS verify	2m	Finger-spread re-hypnosis test. TIME IT. Gentle count out.
21	Debrief	3m	3 Qs: how do you feel, what did you notice, how deep (1-10)?
22	SMART baselines	3m	6 measures (below). Record all.
23	Homework	3m	2 items ONLY: grounding anchor + safe room visit. 988 crisis line.
24	Therapist checklist	Post	SOAP, EP, timing, baselines, safe room details, triggers, CCH log.

Green rows = trance (Steps 10-19). Recording starts at Step 15.

CRITICAL SCREENING (6 MANDATORY QUESTIONS)

1. **Active care?** Therapist, psychologist, psychiatrist? → If yes: coordinate. Get details.
2. **Medications?** Anti-anxiety, anti-depressant, anti-psychotic? → If anti-psychotic: STOP, REFER.
3. **Safety?** "Have you ever had thoughts of harming yourself?" → If active: STOP. 988. Refer.
4. **Trauma scope?** Single vs ongoing? Physical vs emotional? → Scope only, no forced disclosure.
5. **Triggers?** Words, topics, imagery to avoid? → Write down. Refer before every future session.
6. **Panic/dissociation?** Panic attacks? Watching yourself from outside? → Adjust induction if yes.

EP-BRANCHED INDUCTION STRATEGY

If Physical (50%+)

- Arm-raise: power words, elbow-press, magnetic pull, breathing tie-in
- Direct language: "IS rising", "IS relaxing"
- Deepeners: hand-forehead + reactional + heavy/light (optional)
- Kinesthetic anchors: weight, pressure, temperature

If Emotional (50%+)

- Arm-raise: inferential, misdirection, "you may notice", "I wonder"
- Permissive: "you may notice", "allow", "at your own pace"
- Deepeners: reactional only (skip hand-forehead, heavy/light)
- Emotional anchors: safety, warmth, permission

TRAUMA RULES: No regression. No "go back to." Permission language throughout. Exit signal (right index finger). If abreaction: deepen, guide to safe space, do NOT count out abruptly. Safe space = NEW room (not childhood). Gentle count out. PHS includes "safely and comfortably."

SMART GOAL BASELINES (COLLECT AT STEP 22)

MEASURE	QUESTION TO ASK	BASELINE
Self-esteem	"How comfortable do you feel being yourself?" (1-10)	___/10
Assertiveness	"How easy is it to set boundaries or say no?" (1-10)	___/10
Anxiety	"How much does anxiety affect your decisions?" (1=barely, 10=everything)	___/10
Trust	"How much do you trust people closest to you?" (1-10)	___/10
Comfort	"How often do you feel at ease without being on guard?" (1-10)	___/10
Past influence	"How much does the past shape how you react?" (1=barely, 10=everything)	___/10

END OF SESSION CHECKLIST

- ☐ Screening complete (all 6 Qs documented)
- ☐ EP determined: Physical ___% / Emotional ___%
- ☐ Induction time: ___ min. PHS verify time: ___ sec
- ☐ Self-reported depth: ___/10
- ☐ Safe room description: _____
- ☐ Triggers noted: _____
- ☐ Grounding anchor installed (triple-fire)
- ☐ All 6 SMART baselines recorded
- ☐ Count out: gentle, grounded
- ☐ PHS verify: finger-spread test passed
- ☐ Homework assigned (anchor + room verify)
- ☐ Session 2 scheduled: ___/___ at ___
- ☐ 988 crisis line mentioned
- ☐ Stop recording after Step 18
- ☐ CCH hours logged to HMI
- ☐ Update TM-002.json with EP, SOAP, baselines

CLINICAL REMINDERS

Melton

- Check expectations: "What do you think hypnotherapy will do?"
- Focus on BEHAVIOR: "What specific behavior do you want to change?"
- Re-parenting foundations laid via safe space (becomes THE ROOM in S2)

Kappas

- Visit past briefly. Recode. Move forward. Don't loop.
- Preparation of Critical Mind: What's the problem? Why? What needs to change? How?
- "Building pillars" — cognitive supports that open Critical Mind for suggestions.

Nasir (Neuroscience)

- Limbic system holds survival maps — insight alone can't reach it
- Amygdala (threat detection), hippocampus (memory context), vagus nerve (safety state)
- Hypnotherapy adds experiential layer to psychotherapy insight

Evidence-Based Safeguards

- Don't dismiss prior psychotherapy — build on it
- EP informs style, does NOT determine trauma readiness
- Images in trance may be symbolic, not factual
- Agency language: "you can evaluate", "you decide"

RED FLAGS DURING SESSION

- **Abreaction:** Visible distress in trance → deepen, guide to safe space, grounding language. Do NOT count out abruptly.
- **Dissociation:** Blank stare, unresponsive → ground with "feel your feet, feel the chair." Bring back slowly.
- **Abuse disclosure:** If minor/elder abuse disclosed → mandatory reporting. Document. Follow CA procedures.
- **Suicidal ideation:** Stop session. 988 Lifeline. Refer to licensed MHP. Do not continue hypnosis.
- **Psychosis signs:** Disordered thinking, hallucinations → refer immediately. Hypnosis contraindicated.

FRAME: "The therapy you've done gave you understanding and coping tools. Those are real gains. What we do here is add an experiential layer — in a deeply relaxed state, your mind becomes more open to experiencing things differently. We're building on what you've already accomplished."
