| 22     | Student (App State, NC), recreation management + park ranger experience | 69% Emotional  |

PRESENTING CONCERNS

22-year-old student at Appalachian State University, North Carolina. Living with grandfather. Support system: few childhood friends + sister. Childhood abuse from family members including mother. Feelings: abandoned, alone, betrayed, angry, ashamed. Difficulty forming close relationships due to trust issues and fear of vulnerability. Prior psychotherapy helped significantly. Triggers: men yelling (causes fear and anxiety), past trauma discussions. Wants: emotional stability, assertiveness, awareness of past without current anxiety. Forgiveness not fully achieved on past events. CSP pro bono client via HMI. Requested male therapist.

TREATMENT PROTOCOL

|            |                                                                 |
|------------|-----------------------------------------------------------------|
| Modality:  | Clinical hypnotherapy (vocational/avocational self-improvement) |
| Lane:      | 69% Emotional                                                   |
| Duration:  | 6-8 sessions                                                    |
| Frequency: | Every 1-2 weeks                                                 |

| # | FOCUS                                                                     | STATUS    |
|---|---------------------------------------------------------------------------|-----------|
| 1 | Assessment + Intake + Suggestibility Test + First Induction               | Completed |
| 2 | Formal Induction + Safe Space + Grounding Anchor + PHS (deferred from S1) | Upcoming  |
| 3 | Self-Esteem + Confidence Installation                                     | Upcoming  |
| 4 | Trust + Assertiveness + Boundaries                                        | Upcoming  |
| 5 | Anxiety Reduction + Hypervigilance Release                                | Upcoming  |
| 6 | Integration + Self-Hypnosis Independence                                  | Upcoming  |
| 7 | Contingency (if needed)                                                   | Upcoming  |
| 8 | Contingency (if needed)                                                   | Upcoming  |

PROGRESS INDICATORS (SUBJECTIVE + CLINICAL)

| MEASURE                      | BASELINE        | TARGET                                        | METHOD             |
|------------------------------|-----------------|-----------------------------------------------|--------------------|
| Self-esteem                  | TBD (Session 1) | 7-8/10 (confident in own worth)               | Client self-report |
| Assertiveness                | TBD (Session 1) | Comfortable setting boundaries                | Client self-report |
| Anxiety level                | TBD (Session 1) | Manageable, not running the show              | Client self-report |
| Trust in close relationships | TBD (Session 1) | Open, less hypervigilant                      | Client self-report |
| Comfort in own skin          | TBD (Session 1) | 8+/10 (at ease being self)                    | Client self-report |
| Letting go of past           | TBD (Session 1) | Past acknowledged, no longer controls present | Client self-report |

Progress is measured through subjective experience and clinical observation.

IMPORTANT INFORMATION

**Emotional responses:** Hypnotherapy may bring up emotions, memories, or associations that cause temporary discomfort, including delayed emotional responses after sessions. This is a normal part of the therapeutic process.

**Memory accuracy:** Memories, images, or impressions experienced during hypnosis may be symbolic, metaphorical, or inaccurate. They should not be assumed to be factual representations of past events.

**Experiences vary:** Depth of trance, responsiveness, and progress vary between individuals and between sessions. Treatment is adjusted based on your response.

**Confidentiality:** Session content is kept confidential except where disclosure is required by law. If you are receiving services through a community service program, session content may be discussed with clinical supervisors for educational purposes, with your identity protected.

AI DISCLOSURE

This treatment plan was developed by the therapist with AI-assisted tools for documentation. All clinical decisions are performed by the therapist. AI is advisory only.

**SB 577 Disclosure:** Jithendran Sellamuthu, C.MH. is not a licensed physician, psychologist, or psychiatrist. Services are provided for vocational/avocational self-improvement under CA B&P Code §2908. Not a substitute for medical/psychological treatment.

**No Guarantee of Outcomes:** Individual results vary based on suggestibility, compliance, and health. VRishi Hypnotherapy does not guarantee specific outcomes, cure rates, or timelines.

**Therapeutic Exclusions:** Clients on anti-depressant, anti-psychotic, or anti-anxiety medications, or with psychiatric history/suicidal ideation, must be referred to licensed mental health professionals.

**Confidentiality:** All information kept confidential per HIPAA Privacy Rule (45 CFR §§160, 164) and CA law, except where disclosure required by law.
