EFT Induction

Introductory Notes

This script is suitable for clients who are familiar with the routine of Emotional Freedom Techniques (EFT). Variations of the method may be different in which case, please adapt the script accordingly.

Please make yourself comfortable and allow your body to totally relax and your eyes to comfortably close.

We have been through the routine of EFT - and you know all the tapping points so now we are going to use hypnosis to reinforce the affirmations that you have used.

Whilst EFT uses physical contact on the meridian points of your body - hypnosis works with your subconscious mind - so we are going to bring together the actions of your body and thoughts in your mind to help you to accomplish your desire to overcome the problem that you have been experiencing.

And I am going to ask you to think about your tapping points in your mind. You don't need to physically tap these energy zones unless you really want to. All you need to do is to think about the tapping taking place.

So - let us begin with the tapping points on your face - imagine yourself tapping the chin - tap - tap - tap - and as you do - so you can let go of any tension in that part of your face.

And now the point between your nose and your mouth - tap - tap - tap - relaxing even more.

There is a place just above your eyebrows - tap it now - tap - tap - tap - and go even more deeply relaxed.

Then your collarbone - find your sore spot - imagine yourself tapping it - tap - tap - tap - and feeling that slight pressure you can go ten times more deeply relaxed - ten times more

comfortable.

Remember the tapping points on your hands - just above each finger - tap each one - apart from the ring finger which you can ignore - imagine yourself tapping them now - tap - tap - tap - you are tapping into your own natural energy reserve - and you are so comfortable and deeply relaxed.

Remember how you rolled your eyes - up to the top - down to the bottom - humming a tune over and over - relaxing more and more - and more.

You are drifting even more deeply into gentle hypnotic rest.

You are going deeper and deeper - more comfortable and more relaxed than you ever thought possible.

Now let us go through this routine once again - and each time you tap your energy points - I want you to repeat to yourself - I totally and completely accept myself.

Tap the energy points on your face - the chin - I totally and completely accept myself - between the nose and the mouth - I totally and completely accept myself - above they eyebrows - repeat the words again - totally and completely.

Remember your sore spot - imagine the pressure - and when you rest from tapping your body relaxes more and more - you totally and completely accept yourself - yes - you do.

And the points on your hand - just above each finger - imagine yourself tapping - releasing the energy - repeating the words - accept myself - accept myself.

And now I want you to imagine your eyes rolling - first to the right - and then to the left - I totally and completely accept myself.

Accept myself. Accept myself.

And with your eyes remaining closed - imagine looking up to the screen of your mind - that

place just a little higher than the space between your eyes - and create a symbol that means to you - Accept Myself.

You are drifting deeper and deeper into gentle hypnotic rest.

Now I'd like you to hum the words in your mind, "Happy Birthday to Me" - and even though it is not your birthday you know that this session marks the birth of a resolution to your problem - and go deeper and deeper into hypnosis.

You are now very deeply and comfortably relaxed and in the ideal frame of mind to accept suggestions which are for the benefit of your health and well being.

And whenever you hear the suggestions that you instinctively know are the ones that will help you to achieve your goals, perhaps you can imagine tapping your meridian points and allow your subconscious mind to accept these suggestions.

NOTE

Continue with suggestions - or you can further deepen the trance by using one of the deepeners from Hypnotic World. If you notice your client tapping their fingers during hypnosis then emphasise the words - you accept yourself - or whatever seems appropriate.
