ISSUES ADDRESSED

Presenting concern: "I am struggling to sleep because my mind is always busy, even when I am sleeping. I am actually sleeping longer but not well."

Assessment: Behavioral layer producing breakthrough results. Client demonstrated full compliance and best sleep since treatment began. Mouth breathing confirmed as primary snoring mechanism. Three-track approach solidified: (1) physical/structural (nasal breathing, left-side, chin strap if needed), (2) behavioral reprogramming (Depth Dial, installations, ritual), (3) weight management via hypnotherapy (next session). CPAP deferred pending other interventions. HR elevation is chronic stress response, not cardiac pathology (good BP recovery). Emotional eating is the weight loss barrier, not lack of exercise.

SESSION METRICS (CLIENT-REPORTED BASELINE)

0/10	21%	79%	Bad
SLEEP QUALITY (SUBJECTIVE)	DEEP+REM COMBINED*	LIGHT SLEEP	TRACKER DEPTH SCORE

*Tracker data is for client's personal reference — therapy outcomes are measured through subjective experience and clinical observation.

TECHNIQUES USED

PHS re-entry, 5-0 count, reactional x2, progressive relaxation, Depth Dial reinforcement (Delta Lock 0.5 Hz), Sorting Room installation, Settling Pond installation, Island Cabin installation (airway holds open, nasal breathing, wave-breath sync), Pillow Trigger installation, Night-Waking Reset installation. Education: mouth breathing as root cause of snoring, nasal breathing intervention, left-side sleeping, body safety reprogramming (deep sleep is safe), heart rate vs blood pressure distinction, emotional eating identification, CPAP desensitization discussed (deferred), weight management next session.

POST-HYPNOTIC SUGGESTIONS (INSTALLED)

- **1. Sorting Room:** Face Gallery, Language Wing, Map Room files daily data during delta sleep
- **2. Depth Dial:** Surface (8 Hz) to DELTA LOCK (0.5 Hz), permanently installed
- **3. Delta Floor:** Brain bypasses light sleep to delta within 30 min, 3-hour lock
- **4. Settling Pond:** Day's impressions settle like gold dust in still water
- **5. Island Cabin:** Permanent healing sanctuary, cedar, ocean air, cellular regeneration
- **6. Pillow Trigger:** Head on pillow + 4-7-8 = Depth Dial auto-locks to DELTA
- **7. Night-Waking Reset:** Hand on chest + one 4-7-8 = back to delta in 60 seconds
- **8. 10:**30 PM Time Anchor: Nervous system begins shutdown automatically
- **9. Venting Dream Activation:** Vivid dreams = system clearing backlog
- **10. Tracker as Convincer:** Rising deep sleep % reinforces programming

TREATMENT PLAN

Sessions: 6-8
Frequency: Every 1-2 weeks
Approach: Clinical hypnotherapy, Physical suggestible lane (direct/literal)

#	FOCUS	STATUS
1	Assessment + Education + First Induction	Completed
2	THE INSTALLATION (partial) - Depth Dial + cellular regeneration + tension release	Completed
2b	Complete remaining installations + environmental desensitization + self-hypnosis intro	Completed
3	Maintenance + Overactive Mind	Upcoming
4	Independence Pivot — self-hypnosis taught	Upcoming

5	Fine-Tuning	Upcoming

PROGRESS INDICATORS

HOW WE MEASURE	WHERE YOU STARTED	WHAT IMPROVEMENT LOOKS LIKE
Morning restedness	4/10 (exhausted)	7-8/10 (refreshed)
Sleep onset ease	Difficult (~35 min)	Natural, effortless
Night-waking	Frequent, hard to return	Rare, returns easily
Daytime energy	Low, persistent fatigue	Consistent throughout day
Ceremony compliance	Starting	Effortless habit
Self-hypnosis confidence	Not yet learned	8+/10 (fully independent)

Progress is measured through subjective experience and clinical observation.

CLIENT RESPONSIBILITIES

NIGHTLY SLEEP CEREMONY (10:30 PM)	FREQ	DONE
Processing journaling (Wishful Thinking Stage)	Daily	--
Precognitive journaling	Daily	--
Venting with plan for next day/future	Daily	--
Close the journal	Daily	--
Breathing + self progressive relaxation	Daily	--
Dream of deep peaceful sleep + self-hypnosis	Daily	--

NEXT STEPS

Schedule at: calendly.com/jeeth-vrishihypno/90min

If sleep deteriorates significantly or you experience persistent anxiety, panic, or suicidal thoughts — contact your primary care physician immediately.

SB 577 Disclosure: Jithendran Sellamuthu, C.MH. is not a licensed physician, psychologist, or psychiatrist. Services are provided for vocational/avocational self-improvement under CA Business & Professions Code §2908. Hypnotherapy is not a substitute for medical diagnosis, treatment, or psychological care.

Medical Disclaimer — Sleep Apnea: Sleep apnea is a medical condition requiring evaluation and management by a qualified sleep medicine physician. The breathing techniques, sleep position recommendations, and airway suggestions discussed in this session are for relaxation and self-improvement purposes only. They do not diagnose, treat, cure, or prevent sleep apnea or any other medical condition. **Please consult your sleep specialist or primary care physician** before making changes to your sleep apnea management plan, including decisions about CPAP, oral appliances, or medications.

Medical Disclaimer — Heart Rate & Blood Pressure: Observations about heart rate and blood pressure shared during the session are for educational context only and do not constitute medical diagnosis or advice. Elevated heart rate, blood pressure concerns, and cardiovascular health should be managed by your physician. **Do not adjust, discontinue, or replace any prescribed medications** based on information discussed in hypnotherapy sessions.

Medical Disclaimer — Weight Management: Hypnotherapy for weight management addresses behavioral and emotional patterns related to eating. It is not a medical weight loss program and does not replace nutritional counseling, dietary management by a registered dietitian, or medical weight management programs (including GLP-1 medications). **Consult your physician** before beginning or modifying any weight management approach.

Medical Disclaimer — Nasal Breathing & Sleep Position: Recommendations regarding nasal breathing, sleep position (left-side sleeping), and chin straps are general wellness suggestions based on commonly available health information. They are not medical prescriptions. If you experience nasal obstruction, breathing difficulty, or worsening symptoms, **consult your physician or ENT specialist** before continuing.

Scope of Practice: The practitioner provides vocational/avocational self-improvement services only. All medical conditions mentioned in this summary (sleep apnea, cardiovascular concerns, weight management) are outside the scope of hypnotherapy practice and are referenced solely for educational context and to support coordination with your healthcare providers.

No Guarantee of Outcomes: Individual results vary based on suggestibility, compliance, and overall health. VRishi Hypnotherapy does not guarantee specific outcomes, cure rates, or timelines. The improvements reported in this session are subjective self-reports and do not constitute medical evidence of clinical change.

Confidentiality: All information kept confidential consistent with applicable privacy standards and CA law, except where disclosure is required by law (imminent danger to self or others, abuse of a minor or elder).
