SESSION 4 RUNBOOK: WEIGHT MANAGEMENT DEEP-DIVE + S2c SLEEP ITEMS

DS-001 (Deepak S., 56, 76% Physical) | Date: TBD (first/second week Nov) | Zoom | **THERAPIST ONLY**

GATE CHECK: Recording software ready? START RECORDING at Step 4 (S2c installations). Food journal received 48 hrs prior? Trigger map worksheet ready? This is the deepest therapeutic session so far — budget 60-90 min.

STEP 1: CHECK-IN + REVIEW S3 RESULTS

10 MIN

S3 (Oct 22): Emotional Pause installed, Portion Awareness, Food as Fuel, Late-Night Redirect (7 PM), Weight-Sleep Spiral. Homework: food journal, Emotional Pause practice, 7 PM cutoff, slow eating. Client traveled to San Jose first week Nov.

ASK: "Deepak, welcome back. How was San Jose?"

ASK: "First things first — the food journal. Did you keep it?"

ASK: "What patterns emerged? Specific times? Specific situations? Specific emotions?"

ASK: "The Emotional Pause — did you notice it firing? Even once?"

ASK: "Late-night eating — how many nights did you eat after 7 PM?"

ASK: "Sleep — morning restedness, 1 to 10?"

ASK: "Pillow Trigger — automatic or still manual?"

ASK: "Weight — any movement? No judgment, just data."

RECORD: Food journal: Y/partial/N. Emotional Pause: Y/N, times: ___. Late-night eating: ___ nights of ___. Restedness: ___/10. Pillow Trigger: auto/manual. Weight: ___.

SAY: "The sleep system is solid. The weight system is starting. Today we go much deeper than last time."

STEP 2: TRIGGER MAPPING

10 MIN

Get the top 3 triggers from the food journal. Map each: situation → emotion → food choice → aftermath. Select the primary for deep trance work. Physical lane: get the SCENE, the BODY sensation, the FOOD, the AFTERMATH.

SAY: "From your food journal and your experience, what are the top 3 triggers? The 3 situations where the old pattern fires hardest."

ASK: "Trigger 1 — the strongest pull. Where were you? What time? What emotion? What food? How did you feel after?"

ASK: "Trigger 2 — different situation. Same detail."

ASK: "Trigger 3?"

RECORD: T1: situation ___ | emotion ___ | food ___ | aftermath ___

RECORD: T2: situation ___ | emotion ___ | food ___ | aftermath ___

RECORD: T3: situation ___ | emotion ___ | food ___ | aftermath ___

ASK: "Which one feels the most powerful? The strongest pull?"

SAY: "We are going to take that trigger and rewire it. Same trigger. New response. Superior result."

STEP 3: INDUCTION

5 MIN

DO: Start timer NOW. Session 4 — should be fastest entry yet.

SAY: "Close your eyes. Deep breath. Let it out."

SAY: "Raise your arm. Palm facing you. Middle finger. Fingers separating. Hand toward forehead. Magnetic pull."

SAY: "When your hand touches and you nod — Deep Sleep." [Snap.]

PHS: "Each and every time I suggest the words Deep Sleep to you, for the purpose of hypnosis and with your permission, you will enter this state of hypnosis very quickly, calmly, and deeply, and the physical body will relax."

RECORD: PHS re-entry time: ___ sec (S3 was: ___)

SAY: "Hand down. 5 — down. 4 — releasing. 3 — deeper. 2 — approaching delta. 1 — delta. 0 — Deep Sleep." [Snap.]

PHS: Full PHS.

SAY: "Open your eyes." [Wait 2 sec.] "Deep Sleep." [Snap.] "Twice as deep."

PHS: Full PHS.

SAY: "Open your eyes." [Wait 2 sec.] "Deep Sleep." [Snap.] "Twice as deep."

PHS: Full PHS.

Brief progressive: head to toe, 30 sec. He is deep after 4 sessions.

SAY: "Wave of relaxation from the top of your head. Forehead. Eyes. Jaw. Shoulders drop. Arms heavy. Hands warm. Chest. Stomach. Hips. Legs. Feet. Every muscle released."

STEP 4: S2C SLEEP INSTALLATIONS — WOVEN IN

10 MIN

START RECORDING HERE. Everything from here through Step 8 count out goes to the client.

Four remaining S2c items never delivered live: Time Anchor, Venting Dreams, Environmental Shield, Tracker Convincer. Abbreviated from S2c script. Ideomotor nod + PHS per installation.

4a: 10:30 PM TIME ANCHOR

SAY: "Before the weight work, four final sleep installations. These complete the full system."

SAY: "10:30 PM is your shutdown signal. Every night, your nervous system begins the transition automatically. 10:00 journal. 10:15 close. 10:20 tension release. 10:25 breathing + Depth Dial. 10:30 settling. 10:35 Delta Lock. 10:45 delta. Same every night. Weekdays, weekends, travel."

SAY: "Subconscious mind, when the 10:30 PM Time Anchor is calibrated, let a nod happen."

DO: Wait for nod.

PHS: Full PHS.

4b: VENTING DREAM ACTIVATION

SAY: "The hypnotic sleep is a time for your mind to vent thoughts, feelings, and ideas that are no longer beneficial. You will experience vivid dreams. Venting dreams. Each dream clears space. Each dream makes the next night deeper. When you remember a vivid dream, that is proof the hypnosis is working."

SAY: "Subconscious mind, when Venting Dream Activation is installed, let a nod happen."

DO: Wait for nod.

PHS: Full PHS.

4c: ENVIRONMENTAL SHIELD

SAY: "Temperature changes, fan cycling, room cooling — no longer wake you. Your body adjusts automatically. Delta Lock holds. Sounds become part of the sleep. Absorb and continue. Only genuine safety signals bring you to the surface."

SAY: "Subconscious mind, when the Environmental Shield is installed, let a nod happen."

DO: Wait for nod.

PHS: Full PHS.

4d: TRACKER AS CONVINCER

SAY: "Each morning when you check your sleep score, the deep sleep percentage is climbing. Every glance at that screen drives deeper sleep the next night. The tracker does not just measure your sleep. It drives your sleep deeper. A positive feedback loop."

SAY: "Subconscious mind, when the Tracker Convincer is installed, let a nod happen."

DO: Wait for nod.

PHS: Full PHS.

RECORD: S2c nods — Time Anchor: ___. Venting Dreams: ___. Env Shield: ___. Tracker: ___.

STEP 5: EMOTIONAL EATING DEEP WORK

15 MIN

Take the primary trigger from Step 2. Visualize the situation in trance. Feel the emotion. Feel the pull toward food. Then pivot: the Emotional Pause fires at full force. Rewire. Repeat with 2nd trigger. Future-pace. Post-hypnotic. Use HIS specific details.

5a: PRIMARY TRIGGER — DEEP REWIRE

SAY: "Picture yourself in that situation. The primary trigger. See it clearly. Where you are. What time. The room. The lighting. Feel the emotion building. The stress. The pull toward food. The old pattern running."

SAY: "Now watch what happens differently."

SAY: "The Emotional Pause fires. Full force. SNAP." [Snap.] "The hand stops. The feet stop. Everything pauses."

SAY: "In that gap: thumb and finger press. One 4-7-8 breath. You ask: what do I actually need?"

SAY: "The answer is never food. The answer is rest, or connection, or movement, or quiet."

SAY: "You choose the real answer. The craving dissolves. It had no power — it was just a habit."

SAY: "Subconscious mind, when the primary trigger is rewired, let a nod happen."

DO: Wait for nod.

PHS: Full PHS.

5b: SECOND TRIGGER — RAPID REWIRE

SAY: "Now the second trigger. See that situation. The old pattern wakes up. The Emotional Pause fires again. Instantly." [Snap.] "Thumb and finger. One breath. Craving peaks at 30 seconds, weakens at 60, dissolves at 90. You choose the real answer."

SAY: "Every time the old pattern fires and the Pause intercepts it, the old pattern gets weaker. Like a muscle not being used."

SAY: "Subconscious mind, when the second trigger is rewired, let a nod happen."

DO: Wait for nod.

PHS: Full PHS.

5c: FUTURE-PACE

SAY: "Picture yourself at the end of this week. Three meals. Each eaten with awareness. Between meals — nothing. Emotional Pause fired twice, both times you chose the real answer. Kitchen closed at 7:15. Not forbidden. Closed. How does that feel?"

SAY: "Now one month from now. The Pause is fully automatic. The old triggers barely register. Your body feels lighter. Clothes fit differently. Exercise feels easier. Sleep is deeper. The positive spiral is accelerating."

5d: POST-HYPNOTIC

SAY: "Each day, the Emotional Pause gets faster. Each day, the old pattern gets weaker. Within one week, the Pause fires before you consciously register the trigger. Within two weeks, the late-night craving barely registers. Within a month, the new pattern IS the pattern. These suggestions grow stronger by the day, by the hour, by the minute."

SAY: "Subconscious mind, when the post-hypnotic is sealed, let a nod happen."

DO: Wait for nod.

PHS: Full PHS.

RECORD: Deep work nods — Primary trigger: ___. Second trigger: ___. Post-hypnotic: ___.

STEP 6: VIRTUAL GASTRIC BAND (OPTIONAL)

5 MIN

ONLY if his pattern includes overeating at meals (volume/portion issue). If triggers are primarily between-meal snacking and late-night, SKIP to Step 7.

SAY: "Your stomach has a natural size. About the size of your fist. Imagine a gentle band around the upper portion. Not tight. Not restrictive. It amplifies the 'enough' signal."

SAY: "When food reaches this band, the signal fires: satisfied. Not full. Satisfied."

SAY: "Your hand puts down the fork. Not because you are told to. Because your body told you it has enough."

SAY: "Subconscious mind, when the band is installed and the fork-down response is automatic, let a nod happen."

DO: Wait for nod.

PHS: Full PHS.

RECORD: VGB delivered: Y/N. Nod: ___.

STEP 7: WEIGHT-SLEEP INTEGRATION REINFORCEMENT

3 MIN

SAY: "The sleep system and the weight system are now fully connected. Two engines. One machine."

SAY: "Deep sleep lowers cortisol. Lower cortisol normalizes ghrelin and leptin. Normalized hunger hormones make the Emotional Pause effortless."

SAY: "Each night of deep sleep makes tomorrow's eating decisions easier. Each day of mindful eating makes tonight's sleep deeper."

SAY: "The positive spiral is accelerating. The four new sleep installations — Time Anchor, Venting Dreams, Environmental Shield, Tracker Convincer — accelerate the sleep side. Which feeds the weight side. Which feeds the sleep side."

STEP 8: COUNT OUT

3 MIN

SAY: "Zero — sealing in every suggestion. Four new sleep installations complete. The full ten-installation sleep system is running. The Emotional Pause is deepened and personalized. The Virtual Gastric Band amplifies the satisfied signal. The positive spiral accelerates. All permanent. All automatic."

SAY: "One — slowly coming up."

SAY: "Two — physically aware. Mentally alert."

SAY: "Three — coming up higher. Tonight, the full system runs."

SAY: "Four — eyes beginning to open."

SAY: "Five — EYES OPEN. WIDE AWAKE. 1-2-3-4-5 eyes open, wide awake."

STOP RECORDING.

STEP 9: PHS VERIFY

2 MIN

SAY: "Welcome back. How do you feel?"

DO: Give him 30 seconds. Heavy session.

SAY: "Quick test. Raise your arm. Palm facing you. Middle finger. Breathe. Fingers separating. Hand toward face. When it touches — nod. Deep Sleep." [Snap.]

DO: TIME IT. Compare to Step 3 re-entry. Expected: under 10 sec.

RECORD: PHS verify time: ___ sec. Step 3 was: ___ sec. Faster? Y/N.

SAY: "Good. Count out: 1-2-3-4-5 eyes open, wide awake."

SAY: "PHS is rock solid."

STEP 10: HOMEWORK + CLOSE

5 MIN

SAY: "Homework for this period. Five items."

SAY: "One — Food journal continues. Same format: what, when, why. Add a fourth column: PAUSE. Every time the Emotional Pause fires, note the trigger, whether the pause caught it, and what you chose instead."

SAY: "Two — Emotional Pause is now automatic. Do not force it. Notice it. Let it work. Report what you find."

SAY: "Three — 7 PM kitchen close continues. Craving protocol: thumb and finger, 4-7-8, 90 seconds."

SAY: "Four — Self-hypnosis practice. Once per day. Two minutes. Five steps: sit/close eyes, three 4-7-8 breaths, Depth Dial to Delta Lock, one suggestion ('I eat with awareness. I stop when satisfied.') repeated three times, count up 0-5."

SAY: "Five — Listen to today's recording once in bed before sleep."

SAY: "Sleep ritual continues. Full stack. Plus four new installations from today. 10:00 journal, 10:15 close, 10:20 tension release, 10:25 breathing + Depth Dial, 10:30 Time Anchor fires, Pillow Trigger takes over, Environmental Shield on, Delta Lock."

ASK: "Session 5 in one to two weeks. What day works?"

RECORD: S5 scheduled: ____/____/____ at _____

SAY: "Two most important items: the food journal with the pause column, and the daily self-hypnosis. The journal tells me how the Pause is performing. The self-hypnosis builds your independence."

SAY: "Tonight: expect vivid dreams — the Venting Dream installation is new. That is the brain clearing backlog. Also notice if you sleep through things that used to wake you — that is the Environmental Shield."

DO: Send recording. Updated AVS if needed. Log CCH hours.

POST-SESSION CHECKLIST

RECORD: PHS re-entry (Step 3): ___ sec. PHS verify (Step 9): ___ sec.

RECORD: S2c nods — Time Anchor: ___. Venting Dreams: ___. Env Shield: ___. Tracker: ___.

RECORD: Deep work nods — Primary trigger: ___. Second trigger: ___. Post-hypnotic: ___. VGB (if delivered): ___.

RECORD: S3 homework — Food journal: ___. Emotional Pause: ___ times. 7 PM cutoff: ___ nights. Slow eating: ___.

RECORD: Trigger map — T1: ___. T2: ___. T3: ___.

RECORD: Sleep: restedness ___/10. Onset ___ min. Pillow Trigger: auto/manual. Night-wake: ___.

RECORD: Weight movement: ___.

DO: Write SOAP notes.

DO: Update DS-001.json with S4 session data.

DO: Save recording. Send to Deepak.

DO: Log CCH hours to HMI.

DO: Note which nods were weak — reinforce in S5.

DO: Request food journal + pause data 48 hrs before S5.
