SAY: "Subconscious mind, when every installation is permanently sealed and graduation is complete, let a nod happen."

DO: Wait for nod. This should be the strongest nod of the entire program.

RECORD: Graduation seal nod: strong/weak/none.

PHS: Full PHS.

STEP 3: RELAPSE PREVENTION

10 MIN

In trance. Still recording. Address realistic future scenarios. Physical lane: direct, no hedging.

SAY: "There may be nights when sleep is harder. Travel. Stress. Illness. The system does not break. It pauses. When you return to your bed, your pillow, your routine — the Pillow Trigger reactivates. The Depth Dial turns. The system restarts."

SAY: "There may be days when eating is harder. Holidays. Celebrations. Stress. The Emotional Pause is still there. It may be quieter. But it is there. Thumb and finger. One breath. The pause returns."

SAY: "You do not need to be perfect. You need to be consistent. Consistency compounds. One good night builds on the last. One aware meal builds on the last."

SAY: "If you ever need a tune-up, one session resets everything. But you have the self-hypnosis. Two minutes, twice a day. That is your permanent tune-up. You are the operator."

STEP 4: COUNT OUT (FINAL)

5 MIN

SAY: "Zero — sealing everything permanently. All 12 installations. Graduation sealed. Firmware permanent."

SAY: "One — slowly coming up. Bringing everything with you."

SAY: "Three — energy returning. Tonight, two systems run. Tomorrow. Every night. Forever."

SAY: "Four — eyes beginning to open."

SAY: "Five — EYES OPEN. WIDE AWAKE. 1-2-3-4-5. You are a graduate of the VRishi Sleep and Weight Management program."
