SESSION 2a RUNBOOK: DESENSITIZE + HEAL + CREATE NEW IMAGES

TM-002 (T.M., 22, 69% Emotional) | TRAUMA-001 | CSP Pro Bono | Friday Oct 17, 2026 6:00 PM PST | Zoom | **THERAPIST ONLY**

SESSION-WIDE RULES: Emotional lane throughout: permissive, imagery, "you may notice," NO direct commands. No regression. Adult perspective only. New safe environment. Permission language. Exit signal = right index finger. Agency language for re-parenting. No negatives in suggestions. Record Steps 4–11. If abreaction: deepen trance, guide to safe space, do NOT count out abruptly. Memories in trance may be symbolic — do not confirm or dismiss.

GATE CHECK: Recording software ready? Zoom recording works? START RECORDING at Step 4. This session's audio goes to the client.

STEP 1: CHECK-IN + SMART BASELINES

10 MIN

ASK: "How has your week been since our first session?"

Let him talk 2–3 min. Observe energy, posture, eye contact vs Session 1. Match his energy. Be direct but warm.

ASK: "Did you practice the grounding anchor? Thumb and finger, one breath?"

ASK: "Did you visit the safe room in your mind?"

IF YES: "What did it look like? Tell me about it." Note every detail — reference in Step 8. IF NO: "Perfectly fine. We build it together tonight."

ASK: "Did you notice any moments of unexpected calm?"

ASK: "Any dreams this week?"

ASK: "Did you email me positive experiences?"

CRITICAL: If no email, harvest positive experiences LIVE in Step 3. You need at least one positive sensory memory for the anchor.

Do NOT interpret missed homework as sabotage. Ask: "What made the practice difficult?" His answer reveals barriers, not resistance.

SAY: "Now I need to collect some baseline numbers. Six areas, scale of 1 to 10. No right or wrong answers. Just how you feel right now."

ASK: "Self-esteem: 1 = no value in who I am, 10 = confident and worthy. Where are you?"

RECORD: Self-esteem: ___/10

ASK: "Assertiveness: 1 = cannot speak up or set boundaries, 10 = comfortably express needs. Where are you?"

RECORD: Assertiveness: ___/10

ASK: "Anxiety: 1 = anxiety runs the show constantly, 10 = calm and in control. Where are you?"

INVERTED scale: 10 = low anxiety, high calm. Make sure he understands the direction.

RECORD: Anxiety: ___/10

ASK: "Trust: 1 = cannot trust anyone, guard always up, 10 = open and safe with people I choose. Where are you?"

RECORD: Trust: ___/10

ASK: "Comfort in your own skin: 1 = deeply uncomfortable being me, 10 = at ease and at home. Where are you?"

RECORD: Comfort: ___/10

ASK: "Influence of the past: 1 = my past controls everything, 10 = aware of past but it does not run my life. Where are you?"

RECORD: Past influence: ___/10

RECORD: ALL 6 BASELINES: SE ___ AS ___ AX ___ TR ___ CO ___ PI ___

STEP 2: PRIMARY WOUND IDENTIFICATION — LISA'S METHOD

10 MIN

SAY: "There are three primary wounds underneath everything else. These are patterns, not diagnoses. I am going to describe each one. Just notice which one lands. Which one your body reacts to."

SAY: **Abandonment:** "The people who were supposed to keep you safe could not be present. The message: I was not important enough. I was not worth being present for. The care and protection that should have been there was missing. You felt alone in moments when you should not have been alone."

SAY: **Betrayal:** "The people who were supposed to protect you hurt you instead. Through words, actions, choices. The message: the people closest to me are dangerous. If they can hurt me, anyone can."

SAY: **Shame:** "You were not who your parents or family wanted you to be. Not the right kind of kid. The message: there is something fundamentally wrong with who I am."

ASK: "Which of these feels most true for you? Which one lands the hardest? It can be more than one."

DO: PAUSE. Give genuine time. Watch face and body. Do not fill the silence. His body answers before his words.

Clinical expectation: likely BETRAYAL (family hurt him, mother) + ABANDONMENT (felt alone, not protected). Possibly SHAME. Do NOT lead him. Let him choose.

RECORD: Primary wound: _____ Secondary: _____

IF ONE: "Good. That is clear. We work with that tonight." IF TWO: "Which feels deeper? The one underneath the other? We start there." IF ALL THREE: "Which one is loudest right now?" IF UNSURE: "When you think about what happened as a child, what is the first feeling? Being alone? Being hurt? Or being rejected for who you are?"

DO NOT PROCEED without a clear primary wound. This anchors all wound-specific language in Steps 9 and 10.

STEP 3: TARGET EMOTION + SENSORY MEMORY HARVEST

5 MIN

ASK: "How do you wish you felt right now? Give me two words — positive ones. Not what you want to stop feeling. What you want to START feeling."

NO NEGATIVES ALLOWED. If he says "not anxious" → "What would you feel INSTEAD? What is the positive version?" If "less afraid" → "What would courage feel like?" Keep redirecting until 2 clean positive words. Lisa: 8-year-old brain cannot process negatives.

RECORD: Target word 1: _____ Target word 2: _____

ASK: "Tell me a time you felt [word 1]. Even teeny tiny. Who was there? What did you see, hear, feel?"

DO: Get FULL sensory details: visual, auditory, kinesthetic, olfactory. If he struggles: "Think about a time with your sister. Or your friends. A moment outdoors. When did you feel even a little bit of [word 1]?" Let him find it. Do NOT provide the memory.

RECORD: Positive memory: who ___ where ___ saw ___ heard ___ felt ___

SAY: "Breathe in. Say to yourself: I am [word 1] and I am [word 2] and I like it."

DO: Practice together 3 times. Breathe with him. Model it.

SAY: "Three breaths. Three times the neuropathway fires. Neurons that fire together wire together. Seed planted."

STEP 4: RECORDING NOTICE

1 MIN

START RECORDING NOW.

SAY: "We are about to move into the relaxation and therapeutic portion. I am starting the recording now. You signed the consent in advance — you are comfortable with me recording this portion?"

DO: Wait for verbal confirmation. If he declines: proceed without recording, note in post-session checklist.

SAY: "This is a hypnotherapy session recording for T.M. Listen between sessions. Find a quiet place. Do not listen while driving. Close your eyes and follow my voice."

STEP 5: FORMAL EMOTIONAL INDUCTION — INFERENTIAL ARM-RAISING

8 MIN

SAY: "If at any point you want to pause or stop, raise your right index finger. That is your signal. I will stop immediately. You are always in control."

SAY: "Get comfortable. Adjust anything you need. When you are ready, allow your eyes to close. No rush."

Wait for eyes to close naturally. Do NOT say "close your eyes." If 15 sec: "You can allow those eyelids to grow heavy."

SAY: 3 breathing cycles: "Breathe in through your nose. Fill your lungs. Hold. Release slowly. Let the breath carry tension out." Shoulders drop, jaw soften, eye muscles relax.

SAY: **ARM-RAISING (inferential):** "Bring attention to your hands. Left hand: tingling, warmth, lightness. As if bones are hollow. Filled with helium. The hand may want to lift. A string or balloon. Effortless." Meanwhile: "Right hand: heavier. Sinking. Warm heavy blanket. Solid. Grounded."

Watch left hand for micro-movement. Reinforce whatever you see: "That is right." If no movement after 30 sec: "It does not matter how quickly. Whatever is happening is exactly right."

SAY: "As the hand continues to rise, I wonder — is the hand being drawn toward the head, or the head toward the hand? When they make contact, you settle into a deep, comfortable state. Safe. At your own pace."

DO: TIME the induction. Note arm movement quality.

SAY: "When your hand touches your face, nod. Deep Sleep."

PHS: "Each and every time I suggest the words Deep Sleep, for the purpose of hypnosis and with your permission, you will enter this state safely and comfortably, at your own pace, quickly, calmly, and deeply, and the body and mind will settle."

RECORD: Induction time: ___ min. Arm movement: full / partial / none. Response quality: ___

STEP 6: DEEPENING

5 MIN

SAY: **5–0 COUNT:** "I am going to count from five to zero. Each number, your subconscious allows you deeper." Five (settling, safe) → Four (outside world quieter) → Three (body heavy, mind calm) → Two (so deep, so safe) → One (deeper still) → Zero ("Deep Sleep. All the way down.").

PHS: "For the purpose of hypnosis and with your permission, safely and comfortably, the body and mind are settled."

SAY: **REACTIONAL x2:** "I will count to three. On three, Deep Sleep. Ten times deeper." 1-2-3 Deep Sleep. Repeat: "Another ten times deeper. One hundred times deeper than the start. Perfectly safe."

Observe: body sinking, facial smoothing, slowed breathing, REM under lids.

PHS: "Safely and comfortably, at your own pace."

SAY: **PROGRESSIVE RELAXATION:** Warm wave from crown to toes. Delta-paced. Emotional-lane grounding. Crown → forehead → eyes → jaw → neck → shoulders ("weight that was never yours to carry, allow the burden to melt") → arms/hands → chest → stomach ("the part that tightens when you feel unsafe, you are safe here") → hips → legs → feet → toes.

SAY: "Any outside sound will only help you go deeper. Only my voice matters. You are safe."

STEP 7: STAIRCASE — 20 STEPS DOWN

3 MIN

SAY: "See yourself at the top of a staircase. Well built. Solid. Handrails on both sides. Well lit. Safe. Twenty steps. Each step, deeper."

SAY: Count 20 → 1. "Twice as deep" at 17, 12, 7. At 10: "Halfway. You can see the destination — a warm, sunlit space. Open. Spacious. No walls. Just light and warmth and peace." At 1: "Step off into that sunlit space. Warm. Bright. Safe."

PHS: "Deep Sleep. Even deeper now. For the purpose of hypnosis and with your permission, body and mind settled. Safe. Comfortable. Ready."

STEP 8: SAFE SPACE CONSTRUCTION

5 MIN

ASK: "Did you visit the room from last session? Is it still there?"

IF YES (REVISIT): *"Return to it. Has anything changed? Notice details — colors, textures, light, sounds, smells. You decide what enters this space."*

IF NO (FULL BUILD): *"Build a room that exists only in your mind. Not from your past. Completely new. You are the architect." Guide through: size/shape → walls/floor → light/windows/view → furniture → sounds → smell → temperature. Pause 5–7 sec between each. Emotional lane: do NOT describe it for him.*

SAY: "You built it. You decide what enters and what stays outside. Nothing comes in without your permission."

DO: Wait for ideomotor nod ("When you feel settled, let a small nod happen"). If no nod after 20 sec: "Take your time. When you feel ready, that nod will come on its own."

RECORD: Room description: ___ Nod: yes / no / subtle

STEP 9: DESENSITIZE — PROCESS THE PRIMARY WOUND

15 MIN

MOST IMPORTANT SECTION. NOT regression. Adult views younger self from safety. New environment. Client discovers what to say. Do NOT script the re-parenting words. Agency language. Do NOT interpret images as factual memories.

SAY: "From your safe space, notice a window or screen. Through it, you can see a version of yourself at a younger age. You are not going to him. You are observing. From safety. From adult strength."

ASK: "What do you notice about that younger version? How old does he look?"

DO: PAUSE 10–15 sec. Let subconscious provide the image. Do NOT suggest age, setting, or emotion. Note whatever he reports.

ASK: "What is he feeling? Can you tell?"

DO: PAUSE. If emotional: "That is okay. Let yourself feel it. You are safe in your room." Let emotion flow — it is the vehicle of processing.

IF ABREACTION: Do NOT count out. "Deep Sleep. Deeper now. You are safe. You are in your room. Breathe. I am right here." Guide back to safe space. Ground with sensory details (floor, temperature, sounds). Only proceed when stabilized.

SAY: "That younger version did the best he could. He was a child. What happened was not his fault. He did not cause it. He did not deserve it. He survived it."

SAY: **IF ABANDONMENT:** "The people who should have been there were not there. That was their limitation. Not your worth. You were always worth staying for. You were always enough to warrant care and protection. The absence was theirs, not yours."

SAY: **IF BETRAYAL:** "The people who should have protected you chose to hurt instead. That was their failure. Not yours. You did not invite it. You did not deserve it. You deserved safety from the very first day. What they did was a reflection of who they were, not of who you are."

SAY: **IF SHAME:** "You were exactly who you were supposed to be. Nothing wrong with who you arrived as. The rejection was their limitation, not your deficiency. You needed to be seen for who you actually were. And who you actually were was always enough."

If TWO wounds identified: deliver both blocks. Lead with primary. Pause between them.

ASK: "From your adult perspective, looking through that window — what would you want to say to him? What does he need to hear?"

DO: PAUSE 15–20 sec. MOST IMPORTANT PAUSE. Let subconscious provide the words. Do NOT fill silence. Do NOT suggest words.

IF HE STRUGGLES: "What would you want a caring adult to say to a child in that situation?" IF STILL STUCK: "It does not have to be words. It can be a feeling — safety, warmth, protection."

SAY: "That younger version can hear you now. He has been waiting to hear this. And now he is receiving it."

DO: Wait for ideomotor nod: "When you feel that something has shifted, even slightly, let a nod happen." Wait up to 60 sec. Proceed after 90 sec max.

RECORD: Younger self: age ___ setting ___ emotion ___ Client said: ___

SAY: **HYPNOTIC INTENTION — IF ABANDONMENT:** "From this moment forward, you will never abandon yourself. You will listen to your body. You will honor your needs. When you feel alone, you will reach inward and find your own presence. Steady. Strong. Reliable."

SAY: **HYPNOTIC INTENTION — IF BETRAYAL:** "From this moment forward, you will never betray yourself. You will protect yourself. You will honor your boundaries. When someone crosses a line, you will notice it. You will name it. And you will choose what happens next."

SAY: **HYPNOTIC INTENTION — IF SHAME:** "From this moment forward, you will speak to yourself with the same kindness you would offer your closest friend. When the old critical voice appears, you will recognize it as an old recording. And replace it with the truth: you are enough."

PHS: "For the purpose of hypnosis and with your permission, safely and comfortably, this new commitment settles deep into the subconscious mind."

STEP 10: CREATE — NEW IMAGES + DESIRED STATE

10 MIN

SAY: "Still in your safe space, feel what it feels like to be [word 1]. Remember that moment you described earlier. [Reference his specific memory — person, place, sensory details, his exact words.] See it. Hear the sounds. Feel what you felt. Let that feeling fill every cell."

DO: PAUSE 10 sec. Let memory and feeling develop in trance.

SAY: **BREATHING ANCHOR IN TRANCE (3x):** "Breathe in: I am [word 1] and I am [word 2] and I like it. Hold. Release." Repeat 3 times.

SAY: "Three breaths. Each time the neuropathway fires, it gets stronger. Encoded at a deeper level than your conscious mind alone. This is your new default."

SAY: **FUTURE PACE:** "Picture yourself tomorrow. Shoulders back. Heart open. Breathing in the best of your adult self. Not guarded. Not scanning for threats. Just present."

SAY: **TRIGGER REFRAME:** "When the old trigger appears — a loud voice, a tense moment, the old tightness — you notice something new. A gap. A space between the trigger and your response. In that gap, you choose. Shoulders back. Heart open. Breathe. I am [word 1] and I am [word 2]. Same trigger. New response. Superior result."

SAY: "Each day, the gap gets wider. The new response gets faster. The old pattern gets weaker. Not because you are fighting it. Because you are outgrowing it."

SAY: **POST-HYPNOTIC:** "Between now and next session, you will notice moments of unexpected calm. Moments where hypervigilance volume is lower. Something that would have rattled you barely registers. Notice them. Do not dismiss them as coincidence. Each one is proof."

SAY: **VENTING DREAM:** "In the early morning hours, your subconscious will process and clear what no longer serves you. Vivid or unusual dreams are subconscious housecleaning. Let them do their work."

SAY: "The breathing anchor is always with you. One breath. I am [word 1] and I am [word 2] and I like it. The state returns. It is wired. It is yours."

STEP 11: COUNT OUT

5 MIN

SAY: **PHS SEAL:** "Before we return, seal in everything. Every positive suggestion. Every new pattern. Every word you spoke to your younger self. Every breath of I am [word 1] and I am [word 2]. Sealed. Protected. Growing stronger."

SAY: "Zero. Close the door to the subconscious. Seal in every positive suggestion. Block all negatives. Only the positive enters. Only the positive remains."

SAY: **GENTLE 0–5:** One (feel body, surface, feet, temperature). Two (fingers move, toes wiggle, stretch). Three (halfway, refreshed, rested, clear-headed, whatever you processed is settled). Four (more alert, sounds around you, light beyond eyelids, carrying something new). Five ("Eyes open. Wide awake. Fully alert. Welcome back.").

STOP RECORDING.

ASK: "How do you feel?"

DO: Give time. Do not prompt with specific emotions. Let him describe in his own words.

ASK: "What did you notice? What stood out?"

ASK: "Did anything shift? Even something small?"

If shift reported: "Good. Your subconscious doing its work." If nothing obvious: "Sometimes the shift happens after. Over the next few days, notice subtle changes."

RECORD: Depth: ___/10. Observations: ___. Shifts: ___. Younger self age/words: ___

STEP 12: EFT REINFORCEMENT + HOMEWORK

10 MIN

DO: **EFT ROUND:** Karate chop x3 setup: "Even though I used to feel [wound], and part of me still carries that, I choose to feel [word 1] and [word 2] now. I accept myself completely." Then 8 points with affirmation: eyebrow, side of eye, under eye, under nose, chin, collarbone, under arm, top of head.

SAY: "Breathe. One more time in waking state: I am [word 1] and I am [word 2] and I like it."

SAY: **HOMEWORK (5 items):**

SAY: "1. Listen to the session recording at least once. Quiet place. Let your subconscious do the work."

SAY: "2. Practice the breathing anchor every day. Morning and before bed. I am [word 1] and I am [word 2] and I like it."

SAY: "3. When triggered, tap. 8 points. I am [word 1] and I am [word 2]. You can tap lightly with one hand."

SAY: "4. Notice the gap between trigger and response. When you see it: That is the gap. I see it."

SAY: "5. Notice your self-talk. How do you talk to yourself? You do not need to change it yet. Just notice."

ASK: "Can you do those five things?"

DO: Schedule Session 2b (1–2 weeks). Note date/time.

SAY: **SAFETY:** "If anything feels overwhelming between now and next session — first, breathing anchor. Second, email me (24-hour response). Third, if urgent or thoughts of self-harm: call or text 988. Suicide and Crisis Lifeline. 24/7. You are not alone."

SAY: "Thank you for trusting me with this. What you did tonight was real work. You showed up. You went deep. Something shifted. See you next session."

POST-SESSION THERAPIST CHECKLIST

IMMEDIATELY AFTER

RECORD: 1. SOAP notes (incl. verbatim client quotes): [ ]

RECORD: 2. SMART baselines: SE ___ AS ___ AX ___ TR ___ CO ___ PI ___: [ ]

RECORD: 3. Primary wound: Abandonment / Betrayal / Shame. Primary = ___: [ ]

RECORD: 4. Target words: Word 1 = ___ Word 2 = ___: [ ]

RECORD: 5. Positive memory details (who, where, saw, heard, felt): [ ]

RECORD: 6. Younger self: age ___ setting ___ emotion ___ what client said (verbatim): [ ]

RECORD: 7. Ideomotor: safe space nod? ___ Re-parenting nod? ___ Arm movement? ___: [ ]

RECORD: 8. Debrief: first thing noticed ___ shifts ___ surprises ___: [ ]

RECORD: 9. Safe room description (new details or changes from S1): [ ]

RECORD: 10. Induction quality: arm movement ___ trance depth ___ responsiveness ___: [ ]

RECORD: 11. If abreaction: trigger ___ duration ___ intervention ___ outcome ___: [ ]

RECORD: 12. Update TM-002.json (baselines, wound, target words, SOAP): [ ]

RECORD: 13. Save + send recording to client with listening instructions: [ ]
