

SESSION RECORDING CONSENT & AUTHORIZATION

Client Name:

Deepak S.

Case ID:

DS-001

Date:

2026-10-01

Purpose of Recording

- As part of your hypnotherapy program, certain sessions (or portions of sessions) may be audio-recorded. These recordings serve the following purposes:
- Client self-reinforcement:** You may listen to the therapy portion of your session recording between appointments to reinforce post-hypnotic suggestions and deepen the therapeutic effect.
 - Progress tracking:** Recordings help both you and the therapist review session content and track progress over time.
 - Clinical documentation:** Recordings support accurate session notes and treatment planning.

What Will Be Recorded

- The **therapy portion only** of the session (induction, deepening, suggestion work, and emerging).
- The initial consultation, suggestibility assessment, and discussion portions are **not recorded** unless separately agreed.
- Recordings are audio-only (no video) unless otherwise specified.

Terms and Conditions

- Ownership:** The recording is created by the therapist and provided to you for personal therapeutic use only.
- Personal use only:** You agree not to share, distribute, upload, broadcast, or publish the recording in any form (social media, messaging apps, file-sharing services, etc.).
- Storage:** Store recordings on an encrypted or password-protected device. Do not store on unencrypted cloud services or shared devices.
- Deletion:** Upon completion or termination of the program, the therapist will delete their copy of recordings within 30 days unless you request otherwise in writing. You may retain your personal copy.
- Confidentiality:** Recordings contain protected health information (PHI) and are subject to HIPAA Privacy Rule (45 CFR §§160, 164) protections.
- Revocation:** You may revoke this consent at any time by notifying the therapist in writing. Revocation does not apply to recordings already made with your consent.
- California law:** California is a two-party consent state (Penal Code §632). This form satisfies the consent requirement for both parties.

Safety Warning — Listening to Session Recordings:

- Never listen to recordings while driving, operating machinery, or in any situation requiring alertness.** Hypnosis recordings can induce trance states.
- Listen only in a safe, comfortable environment where you can relax fully (e.g., lying in bed before sleep).
- If you experience any distress while listening, stop the recording and contact the therapist.
- Do not allow others to listen to your recording — the suggestions are personalized for your suggestibility profile and may not be appropriate for others.

Client Consent

- By signing below, I acknowledge and agree:
- ☐ I consent to audio recording of the therapy portions of my hypnotherapy sessions.
- ☐ I understand the recordings are for my personal therapeutic use only and will not be shared or distributed.
- ☐ I will store recordings securely on a password-protected or encrypted device.
- ☐ I understand the safety warnings about listening to recordings and will follow them.

☐ I understand I may revoke this consent at any time in writing.

☐ I understand that recordings contain PHI and are protected under HIPAA.
