

DS-001: SESSION 2b FULL SCRIPT — COMPLETING THE INSTALLATION

DS-001 (Deepak S., 56) | Date: _____ | Zoom | SLEEP-004 | 76% Physical, Kinesthetic-dominant | **THERAPIST ONLY — DO NOT DISTRIBUTE**

SESSION OVERVIEW

[Session 2a (Oct 9) installed: Depth Dial (Delta Lock 0.5 Hz), cellular regeneration visualization, tension release ritual, journaling protocol, nasal breathing education, vagus nerve techniques. Ran 90 minutes and could not complete remaining installations. THIS session completes the installation package. Focus: Sorting Room, Settling Pond, Island Cabin, Pillow Trigger, Night-Waking Reset, Time Anchor, Venting Dreams, Environmental Desensitization, Tracker Convincer. Physical lane throughout: DIRECT, LITERAL, SPECIFIC. "You ARE" not "you may notice."]

SESSION 2a FINDINGS TO ADDRESS: Sleep apnea identified. No sugar after 4:30 PM. Temperature fluctuations wake him. Fan noise disrupts. Averaging 1.5 hrs deep sleep. Nasal breathing + jaw headband recommended. 3-stage journaling started.

STEP	TIME	WHAT	NOTES
1	10 min	Check-in + data review	Sleep data since S2a. Homework compliance. Depth Dial experience.
2	5 min	Induction (PHS re-entry)	Finger-spread, Deep Sleep [Snap], 5-0 count, reactional x2. TIME IT.
3	5 min	Progressive relaxation	START RECORDING. Delta-paced. Cellular regeneration language.
4	3 min	Depth Dial reinforcement	Reconnect with brass dial. Turn through all levels to Delta Lock.
5	25 min	Remaining installations (9 PHS)	Sorting Room, Settling Pond, Island Cabin, Pillow Trigger, Night-Waking Reset, Time Anchor, Venting Dreams, Environmental Desensitization, Tracker Convincer.
6	3 min	Interrupted sleep protocol	Pretend-sleep + miniature golf (Bruce).
7	3 min	Count out	Seal all installations. 0-5. STOP RECORDING.
8	2 min	PHS verify	Finger-spread test. TIME IT.
9	5 min	Homework + close	Updated ritual, bedside card, recording, schedule S3.

PHYSICAL LANE REMINDER (76% Physical): Direct. Literal. Specific. No "you may notice" — use "you ARE." Kinesthetic anchors: weight, temperature, muscle release. Every PHS ends with the full formula.

STEP 1: CHECK-IN + DATA REVIEW (10 MIN, CONSCIOUS)

Deepak, welcome back. Before we go into hypnosis, let us review how the week has been.

Sleep Quality Check

How has sleep been since our last session?

[Listen. Let him talk. Note: subjective quality, onset time, wake-ups, energy levels. Do NOT lead.]

Let us look at specifics. The tension release practice — fists, shoulders, face. Have you been doing it before bed?

The journaling — analysis, prediction, plan of record. How is that going? Are you closing the journal at the end?

The nasal breathing — have you tried the jaw headband? Any difference?

The Depth Dial — did you notice it working? Any moments where you felt it click? Any times you reached for it consciously?

Data Comparison

Show me your watch readings.

[Review tracker data together. Compare to S1 baseline: 4/10 sleep quality, 21% Deep+REM, 79% light, depth score Bad. Also compare to S2a findings: averaging 1.5 hrs deep sleep. Note any improvements or regressions.]

Remember: we are tracking five measures. Combined Deep+REM percentage going up. Light sleep going down. Depth score improving. Subjective quality moving toward 7 or 8 out of 10. And sleep onset time shortening.

Any changes to note? Sugar after 4:30? Temperature at night? The fan cycling?

Here is what today is about. Last session we installed the Depth Dial and delivered the cellular regeneration visualization. We ran out of time before we could install the rest of the programming.

Today we complete that installation. Nine more post-hypnotic suggestions. Each one is a specific tool that runs automatically during your sleep. By the end of today, the full system is online.

The induction will be fast — your subconscious already knows the path. We go straight to the installations.

Questions before we begin?

STEP 2: INDUCTION — PHS RE-ENTRY (5 MIN)

PHS Re-Hypnosis Test

[Time the re-entry. This is Session 2b — should be significantly faster than S2a. The PHS has had time to condition. Compare: S1 = __ min, S2a = __ min, S2b = __ min. Start timer NOW.]

Sit with your feet flat on the floor. Hands on your legs. Good.

Raise your arm and bend it at the elbow. Palm in front of your face, about ten inches away, fingers straight up, above eye level.

Stare at your middle finger. Take a deep breath. On the exhale, your fingers begin to separate. Separating, separating, wider and wider, farther and farther apart.

Separating, separating, wider and wider, farther and farther apart. [Pause.]

Separating, separating, wider and wider, farther and farther apart. [Pause.]

[Observe: speed of finger separation compared to S2a. Faster = deeper PHS conditioning.]

Your hand IS moving toward your forehead. The magnetic pull IS drawing your hand and your head together. With every breath, closer. Lifting. Rising. [Pause.]

When your hand touches your forehead and you give me a nod, your eyes will close and you will enter the hypnotic sleep. [Pause.]

[Wait for hand to touch forehead. Wait for nod.]

[Snap] — DEEP SLEEP.

Each and every time I suggest the words Deep Sleep to you, for the purpose of hypnosis and with your permission, you will enter this state of hypnosis very quickly, calmly, and deeply, and the physical body will relax.

[S2b re-entry time = __ min/sec. Record. Compare to S1 and S2a.]

5-0 Count

Relax your hand. Let it come back down to your lap. [Pause.]

I will use a count from five down to zero. With each count, deeper.

Five — going down now. Your body remembers this path. It has been here before. And it IS returning faster. [Pause.]

Four — physically releasing. Every muscle from forehead to feet softening. Standing down. [Pause.]

Three — an emotional calmness. Peace settling in. The noise of the day fading. [Pause.]

Two — mentally relaxing. Thoughts slowing. The analytical mind stepping back. [Pause.]

One — deeper. Past the surface. Into the quiet. The subconscious is wide open. [Pause.]

And zero — [snap] — DEEP SLEEP. All the way down.

Each and every time I suggest the words Deep Sleep to you, for the purpose of hypnosis and with your permission, you will enter this state of hypnosis very quickly, calmly, and deeply, and the physical body will relax.

Reactional (2 cycles — fast, we have installations to do)

[Two cycles only. Establish depth quickly and move to installations. Do not linger.]

Open your eyes. Find a spot and stare at it.

[Wait 2 seconds.]

[Snap] — DEEP SLEEP. Twice as deep. Eyes closed. Sinking down. [Pause.]

Open your eyes again.

[Wait 2 seconds.]

[Snap] — DEEP SLEEP. Deeper still. Like a stone dropping into still water. The body IS heavy. The mind IS quiet. [Long pause.]

Each and every time I suggest the words Deep Sleep to you, for the purpose of hypnosis and with your permission, you will enter this state of hypnosis very quickly, calmly, and deeply, and the physical body will relax.

STEP 3: PROGRESSIVE RELAXATION (5 MIN)

START RECORDING FOR CLIENT HERE. Delta-paced: 2-second pauses between phrases. Slow, deep, authoritative voice. This recording will be the client's take-home audio for S2b.

Pay no attention to outside sounds. [Pause.] Any sound you hear — traffic, the fan, the house settling — that sound pushes you deeper. [Pause.] Every sound is a signal to go further down. [Long pause.]

Focus on the top of your head. [Pause.] Every cell at the crown is regenerating. [Pause.] A faint warmth spreading across your scalp. [Pause.] Renewal. The body IS rebuilding itself right now. [Long pause.]

Your forehead flattens. [Pause.] Every crease smoothing. [Pause.] The muscles around your eyes release. [Pause.] Your jaw drops open slightly — the hinge unclenches. [Pause.] The tension that lived there all day is dropping away. [Long pause.]

Neck softens. [Pause.] Shoulders drop to their natural position. [Pause.] Gravity reclaims them. [Pause.] Feel the weight of your own arms. [Pause.] Heavy. Warm. Still. [Long pause.]

Cellular repair is activating now. [Pause.] Your pituitary gland is releasing growth hormone — the master repair signal. [Pause.] This only happens in deep delta sleep. [Pause.] And you are entering delta now. [Pause.] Growth hormone floods into the bloodstream. [Pause.] It reaches every tissue, every organ, every muscle fiber. [Pause.] REBUILD. RESTORE. REGENERATE. [Long pause.]

Arms releasing. [Pause.] Forearms. Wrists. Hands open, palms up, fingers softening. [Pause.] The warmth spreading from shoulders to fingertips is growth hormone arriving. [Long pause.]

Chest opens. [Pause.] Diaphragm drops low and flat. [Pause.] Sympathetic nervous system shutting down. [Pause.] Parasympathetic switching on. [Pause.] Cortisol throttling down. [Pause.] Recovery hormones coming online. Melatonin. Growth hormone. [Pause.] The night shift is clocking in. [Long pause.]

Core relaxing. [Pause.] Lower back releasing. [Pause.] Hips widening into the chair. [Pause.] Your immune system activating at peak capacity. [Pause.] T-cells multiplying. Natural killer cells patrolling. [Pause.] This only happens in deep sleep. Your body KNOWS this. [Long pause.]

Thighs releasing. [Pause.] Calves softening. [Pause.] Ankles, feet, toes. [Pause.] Every system in maintenance mode. [Pause.] Your glymphatic system — the brain's waste-clearance network — is flushing toxins from between your neurons. [Pause.] Channels opening. Fluid moving. The brain IS cleaning itself. [Long pause.]

Your body IS releasing. Your muscles ARE softening. Every cell IS regenerating. [Long pause.]

STEP 4: DEPTH DIAL REINFORCEMENT (3 MIN)

Return to the Depth Dial. [Pause.] You installed it last session. It is still there. [Pause.] It has been there all week. [Pause.] Feel the brass under your fingers. [Pause.] Heavy. Smooth. Machined to precision. Real. Solid. [Long pause.]

Turn it now. [Pause.] From Surface... through Shallow... through Medium... through Light... all the way down to Delta Lock. 0.5 hertz. [Long pause.] Feel each level. [Pause.]

Surface at 8 hertz — the busy mind. Planning. Processing. The engine idling. [Pause.]

Shallow at 6 — thoughts slowing. The noise beginning to fade. [Pause.]

Medium at 4 — the noise fading further. Muscles releasing. [Pause.]

Light at 2 — almost quiet. Breathing deepening. Heavy. [Pause.]

Deep at 1 — still. Heavy. Restorative. [Pause.]

And Delta Lock at 0.5 — the deepest, most restorative frequency your brain can sustain. [Long pause.]

Click. [Pause.] Locked. [Long pause.]

The dial clicks into place. That satisfying mechanical lock. The same lock you felt last session. Stronger now. More familiar. More automatic. [Long pause.]

Subconscious mind, when the dial clicks to Delta Lock, let a nod happen. [Wait for signal.]

[Wait for ideomotor nod. This should come faster than in S2a — the Depth Dial is already installed. If no nod after 10 seconds, repeat once.]

Each and every time I suggest the words Deep Sleep to you, for the purpose of hypnosis and with your permission, you will enter this state of hypnosis very quickly, calmly, and deeply, and the physical body will relax.

STEP 5: THE REMAINING INSTALLATIONS (25 MIN)

CLINICAL NOTE: Nine installations. Ideomotor check after each. Full PHS after each. Monitor client fatigue throughout. If nods weaken, prioritize: Pillow Trigger, Night-Waking Reset, Environmental Desensitization are the critical three. The rest can reinforce in S3 if needed.

Installation 5a: The Sorting Room (Face Gallery, Language Wing, Map Room)

You step through a doorway into a warm, quiet room. [Pause.] Wood panels on every wall. Amber light from brass sconces. [Pause.] The smell of old books and leather. [Pause.] This is the Sorting Room. [Long pause.]

Gentle librarians work silently. [Pause.] Your subconscious processing team. [Pause.] They have been waiting for you. [Long pause.]

One carries today's new faces to the Face Gallery. [Pause.] Every face you saw today — the colleague on the video call, the waiter at the restaurant, the stranger on the street — filed, categorized, cross-referenced. [Pause.] Tomorrow, recognition is instant. No searching. No hesitation. Instant. [Long pause.]

Another carries new words to the Language Wing. [Pause.] Every new phrase, every cultural reference, every idiom you heard today — sorted into the language architecture. [Pause.] Tomorrow, the words come easier. The flow is smoother. [Long pause.]

A third carries routes to the Map Room. [Pause.] Every street you walked, every turn you made, every landmark you passed — integrated into your spatial map. [Pause.] Tomorrow, the city feels more like home. [Long pause.]

All of this happens silently. Below awareness. The librarians work best when you are deeply asleep. [Pause.] The deeper you go, the faster they file. [Pause.] They do not need your permission. They do not need your supervision. They just need you in delta. [Long pause.]

Subconscious mind, when the Sorting Room is fully operational and the librarians are at their stations, let a nod happen. [Wait for signal.]

[Wait for ideomotor nod. If no response after 10 seconds, repeat once.]

Each and every time I suggest the words Deep Sleep to you, for the purpose of hypnosis and with your permission, you will enter this state of hypnosis very quickly, calmly, and deeply, and the physical body will relax.

Installation 5b: The Settling Pond

The Sorting Room opens to a courtyard. [Pause.] Cool air. Moonlight. [Pause.] In the center, a perfectly still pond. [Pause.] The water is clear, illuminated by soft silver light from above. [Long pause.]

All the impressions of the day — faces, conversations, new flavors, street sounds, lines of code, architectural decisions, problem-solving loops — are like particles of gold dust stirred up in this water. [Pause.] Right now, the water is swirling. Active. Turbulent. [Pause.] Your overactive mind — all those thoughts that kept you company all day — they are the swirl. [Long pause.]

Watch. [Pause.] You do not force anything. [Pause.] You do not fight the thoughts. [Pause.] You do not push them away. [Pause.] You simply stop stirring. [Pause.] And gravity does the rest. [Long pause.]

The particles settle. [Pause.] Slowly. [Pause.] Gently. [Pause.] Each finding its place at the bottom. [Pause.] Not lost. [Pause.] Perfectly preserved. [Pause.] Just settled. [Long pause.]

The thought about tomorrow's meeting — it drifts down. Settles. Filed. [Pause.] The unresolved conversation from earlier — it drifts down. Settled. Filed. [Pause.] The planning, the problem-solving, the scenarios your engineer's brain has been running — they drift down. [Pause.] One by one. [Pause.] Each particle finding its place. [Long pause.]

The water grows clearer with each breath. [Pause.] The surface becomes glass-smooth. [Pause.] Reflecting only the moon. [Pause.] Not a single ripple. [Long pause.]

Your overactive mind is like this pond when stirred. [Pause.] You do not fight the thoughts. [Pause.] You do not push them away. [Pause.] You simply stop stirring. [Pause.] And gravity does the rest. [Pause.] Stillness does the work. [Long pause.]

Subconscious mind, when the Settling Pond is established and the particles are settled, let a nod happen. [Wait for signal.]

Each and every time I suggest the words Deep Sleep to you, for the purpose of hypnosis and with your permission, you will enter this state of hypnosis very quickly, calmly, and deeply, and the physical body will relax.

Installation 5c: The Island Cabin

The pond opens to a shoreline. [Pause.] You are on a private island. [Pause.] Warm air on your skin. [Pause.] Gentle waves breaking rhythmically on wet sand. [Pause.] Palm trees swaying in a breeze you can feel on the back of your neck. [Long pause.]

This island exists only for you. Only for rest. Only for healing. [Pause.] No one else is here. No notifications. No meetings. No decisions. [Long pause.]

Walk along the beach. [Pause.] Feel the warm sand between your toes. [Pause.] The sand is firm and damp near the waterline. [Pause.] Each step is solid, grounded, real. [Pause.] Ahead, set back from the shore, nestled between palms — a cabin. YOUR cabin. [Long pause.]

Walk inside. [Pause.] The scent of cedar and clean ocean air. [Pause.] Ceiling fan turning slowly overhead — you can hear the soft whir. [Pause.] The temperature is exactly right. [Pause.] Warm but not hot. Cool enough for the blanket. [Long pause.]

The bed is perfect. [Pause.] Firm mattress — engineered, not soft. [Pause.] Cool sheets that feel like silk against your skin. [Pause.] A weighted blanket folded at the foot of the bed. [Long pause.]

Lie down. [Pause.] Pull the weighted blanket over you. [Pause.] Feel its weight pressing you into the mattress. [Pause.] Fifteen pounds of even, distributed pressure across your entire body. [Pause.] Secure. Protected. Held. [Long pause.]

Feel its weight pressing you into the mattress. [Pause.] The weight IS the signal. The body interprets that pressure as safety. [Long pause.]

Every cell regenerating. Growth hormone flowing. [Pause.] Glymphatic system flushing waste from between your neurons. [Pause.] Immune cells multiplying. [Pause.] You are being rebuilt from the inside out. [Pause.] The cabin holds you. The blanket holds you. The island holds you. [Long pause.]

And the waves. [Pause.] Each wave that breaks on the shore outside your cabin matches a breath. [Pause.] In with the wave. [Pause.] Out as it recedes. [Pause.] In. [Pause.] Out. [Pause.] The rhythm of the ocean IS the rhythm of your sleep. [Long pause.]

Subconscious mind, when the Island Cabin is established as your permanent sleep sanctuary, let a nod happen. [Wait for signal.]

Each and every time I suggest the words Deep Sleep to you, for the purpose of hypnosis and with your permission, you will enter this state of hypnosis very quickly, calmly, and deeply, and the physical body will relax.

Installation 5d: Pillow Trigger (critical PHS)

PRIORITY INSTALLATION. This is the anchor that ties everything together. Slow down. Let each line land.

Now the automation. [Pause.] Every night, from tonight forward, a simple sequence activates. [Long pause.]

When your head touches the pillow — [Pause.] — and you feel the weight of your head sinking into it — [Pause.] — that physical sensation of heaviness — [Pause.] — the Depth Dial automatically turns to Delta Lock. [Pause.] No thought required. No decision. The pillow IS the trigger. The body does the rest. [Long pause.]

You take your first 4-7-8 breath. [Pause.] Tongue on the ridge behind your upper teeth. In for four. Hold for seven. Out for eight. [Pause.] On that first exhale, the Sorting Room librarians begin their work below the floor. [Long pause.]

Second breath. [Pause.] On that exhale, the Settling Pond particles are drifting down. [Pause.] The thoughts that were swirling — they settle. [Long pause.]

Third breath. [Pause.] Quiet. Warm. Dark. The Island Cabin is forming around you. [Pause.] The cedar. The waves. The blanket. [Long pause.]

Fourth breath — sleep. [Pause.] Delta. [Pause.] Three hours of uninterrupted deep restoration. [Long pause.]

This sequence runs every night. [Pause.] Automatically. [Pause.] Without effort. [Pause.] Without conscious involvement. [Pause.] The pillow is the trigger. The breath is the engine. The subconscious is the driver. [Long pause.]

Subconscious mind, when the Pillow Trigger is fully installed and will activate tonight, let a nod happen. [Wait for signal.]

Each and every time I suggest the words Deep Sleep to you, for the purpose of hypnosis and with your permission, you will enter this state of hypnosis very quickly, calmly, and deeply, and the physical body will relax.

Installation 5e: Night-Waking Reset

And if you wake in the night — for any reason — the protocol is instant. [Long pause.]

Place your hand on your chest. [Pause.] Feel the warmth of your own palm against your sternum. [Pause.] Feel your heartbeat under your hand. [Pause.] That touch IS the signal. [Long pause.]

Take one 4-7-8 breath. [Pause.] In for four. Hold for seven. Out for eight. [Long pause.]

On the exhale, the Depth Dial resets to DELTA LOCK. [Pause.] The Settling Pond resets. The particles settle again. [Pause.] You drift back to delta within 60 seconds. [Long pause.]

You do not check the phone. [Pause.] You do not look at the clock. [Pause.] You do not think about anything. [Pause.] Hand. Breath. Dial. Delta. [Long pause.]

Subconscious mind, when the Night-Waking Reset is installed, let a nod happen. [Wait for signal.]

Each and every time I suggest the words Deep Sleep to you, for the purpose of hypnosis and with your permission, you will enter this state of hypnosis very quickly, calmly, and deeply, and the physical body will relax.

S2b CORE INSTALLATIONS COMPLETE: Sorting Room, Settling Pond, Island Cabin, Pillow Trigger, Night-Waking Reset. Combined with S2a (Depth Dial + Cellular Regeneration), seven installations delivered. Remaining: Time Anchor, Venting Dreams, Environmental Shield, Tracker Convincer + self-hypnosis scheduled for Session 2c.

STEP 7: COUNT OUT (0-5)

Zero — sealing in every installation. [Long pause.]

Sorting Room — librarians at their stations, filing faces, words, and routes. [Pause.]

Depth Dial — locked at Delta Lock, 0.5 hertz. Reinforced. [Pause.]

Settling Pond — particles settled, water glass-smooth. [Pause.]

Island Cabin — cedar, ocean air, weighted blanket, your permanent sanctuary. [Pause.]

Pillow Trigger — head on pillow, four breaths to delta. [Pause.]

Night-Waking Reset — hand on chest, one breath, back to delta in 60 seconds. [Pause.]

10:30 PM Time Anchor — nervous system begins shutdown automatically. [Pause.]

Venting Dreams — vivid dreams clearing the backlog. [Pause.]

Environmental Shield — temperature, fan, sounds absorbed. Delta Lock holds. [Pause.]

Tracker Convincer — every glance at the screen drives deeper sleep. [Pause.]

All permanent. All automatic. All running tonight. [Long pause.]

One — coming up. [Pause.]

Two — physically aware. Mentally sharp. [Pause.]

Three — coming up higher. Tonight, every installation activates. [Pause.]

Four — eyes beginning to open. [Pause.]

Five — eyes open, wide awake. Alert. Refreshed. And tonight, the full system runs.

One, two, three, four, five — eyes open, wide awake.

STOP RECORDING HERE. The client recording includes Steps 3 through 7 (progressive relaxation through count out). Save to MinIO: client-documents/DS-001/recordings/S2b-completion-session.mp3.

STEP 8: FINGER-SPREAD PHS VERIFY

Welcome back. How do you feel?

[Brief check-in. Let client orient. Note affect, facial expression, body posture. Give them 30-60 seconds.]

Raise your arm. Palm in front of your face. Middle finger. [Pause.] Breathe — fingers separate. [Pause.]

Hand moving toward your face. [Pause.] Eyelids heavy. [Pause.]

When your hand touches — nod. Deep Sleep. [Snap.]

Good. The post-hypnotic suggestion is installed and working.

Each and every time I suggest the words Deep Sleep to you, for the purpose of hypnosis and with your permission, you will enter this state of hypnosis very quickly, calmly, and deeply, and the physical body will relax.

Count out: One. Two. Three. Four. Five — eyes open, wide awake.

[Report PHS re-entry time to client: "Your re-entry time went from ___ in Session 1 to ___ in Session 2a to ___ today. That is the post-hypnotic suggestion conditioning. Faster each time."]

STEP 9: HOMEWORK + CLOSE (5 MIN)

Updated 6-Step Pre-Sleep Ritual (with times)

Your ritual is updated now. Same structure, but the Depth Dial and all the installations are woven in. Here is the sequence:

Step 1 — 10:00 PM. Journaling. Three parts: analysis of the day, prediction for tomorrow, plan of record. Get it all on paper.

Step 2 — 10:15 PM. Close the journal. Physically shut it. Processing complete.

Step 3 — 10:20 PM. Tension release. Fists, shoulders, face. Fifteen seconds. Your body's shutdown signal.

Step 4 — 10:25 PM. In bed. 4-7-8 breathing, three cycles. While you breathe, visualize the Depth Dial turning. Surface... Shallow... Medium... Light... Deep... Delta Lock. Click.

Step 5 — 10:30 PM. The Pillow Trigger activates. The Sorting Room librarians begin. The Settling Pond clears. The Island Cabin forms. Delta Lock. Sleep.

Step 6 — if you wake. Hand on chest. One 4-7-8 breath. Depth Dial resets to Delta Lock. Back to delta in 60 seconds. No phone. No clock. Hand. Breath. Dial. Delta.

Night-Waking Protocol

If you are still awake after the reset, play miniature golf in your mind. See each hole. Feel the club. Hear the ball roll. Most people are asleep by hole five.

Depth Dial Practice

Between now and our next session, practice the Depth Dial once during the day. Close your eyes, find the dial, turn it down from Surface to Delta Lock. Do not go to sleep — just practice the visualization. Three minutes. The more you practice it awake, the faster it locks at night.

Session Recording

I am sending you the recording of the relaxation and installation portion of today's session. Listen to it in bed at least once before our next session. It is a reinforcement tool, not a replacement for the ritual. Do the ritual first. If you are still awake, press play.

Tracking

Track every 3 to 4 days. Not daily. Three things: how you feel waking up, 1 to 10. Sleep onset ease, difficult to effortless. Night-waking, frequent to rare. Bring the data to our next session.

Dream Journal

If you wake remembering a vivid dream, write 2 to 3 words. If no dreams, write "none." Both are data. Remember — vivid dreams mean the venting is working.

The 5-minute bedtime Zoom offer still stands for this week. At 10:30 PM, we connect. You are in bed. I guide you through the Depth Dial and settling — five minutes, then I hang up and you sleep. Text me if you want it.

Schedule Session 3

Session 3 is maintenance and reinforcement. We address the overactive mind directly and reinforce any installations that need strengthening. One to two weeks out. Book it before you leave today.

How are you feeling? Questions?

POST-SESSION THERAPIST CHECKLIST

#	TASK	DONE?
1	Count out: energetic, crisp 1-2-3-4-5	
2	Finger-spread PHS verify completed	
3	Report PHS re-entry time improvement (S1: ___ / S2a: ___ / S2b: ___)	
4	Stop recording after Step 7 (count out)	
5	Assign updated 6-step pre-sleep ritual (confirm understanding)	
6	Give updated Bedside Quick Reference card (PDF or screen share)	
7	Send AVS (Session 2b After Visit Summary)	
8	Offer 5-min bedtime Zoom for this week (10:30 PM)	
9	Schedule Session 3 (1-2 weeks out)	
10	Save session recording: client-documents/DS-001/recordings/S2b-completion-session.mp3	
11	Update DS-001.json with Session 2b data (date, techniques, SOAP, feedback)	
12	Write SOAP note in case journal	
13	Note which installations received strong nods vs weak/absent — reinforce weak ones in S3	
14	Note client fatigue level at end — adjust S3 density accordingly	
15	Compare S2b re-entry time to S1 and S2a — document conditioning curve	
16	Note any new sleep apnea or environmental findings for S3 targeting	

RED FLAGS TO WATCH:

- **Fatigue risk:** Client flagged tendency to "lose or get fatigue after 4-5 sessions." Front-load impact. Build independence by S4.

- **Ideomotor weakening:** If nods slowed or stopped during installations, note which ones. Reinforce in S3.

- **Tracker obsession:** If Deepak fixates on numbers, deploy reverse induction (Bruce). Reframe to subjective.

- **Sleep apnea:** Monitor. If deep sleep does not improve despite good compliance, refer for sleep study.

- **Environmental:** Confirm jaw headband purchased. Confirm no sugar after 4:30 PM. Confirm temperature management.
