SESSION 4 FINAL READOUT — INNER CHILD: DESENSITIZE + REPARENT + VOICE + MESH FILTER

TM-002 (T.M., 22, 69% Emotional) | TRAUMA-001 | CSP Pro Bono | [DATE TBD] 6:00 PM PST | Zoom | ~100 min | 22 Phases | **READ TOP TO BOTTOM — THERAPIST ONLY**

SESSION-WIDE RULES: Emotional lane: permissive, imagery, "you may notice." NOT regression — adult views younger self in NEW safe environment. Client discovers what to say (do NOT script reparenting words). Agency language. If abreaction: deepen trance, guide to safe space, do NOT count out. Exit signal = right index finger. Memory images may be symbolic. Record from Phase 5 onward. ALL script wording is ORIGINAL.

JOURNAL INPUT (Oct 28): T.M.'s exact words:
1. "I still find myself thinking that the **people I care about don't actually care about me** at times and it makes me feel very alone even when I'm in the group."
2. "I think subconsciously I have a hard time believing that people truly care about me and that **I'm a good person**."
3. "It was easy to offer support to them, and that helped a little with being less closed off."
Behavioral coping CONFIRMED. Phase 2 (inner child) is indicated. The subconscious beliefs are the bottleneck — behavioral tools cannot reach them.

TECHNIQUE STACK (7 methods, 4 sources):
Kappasinian: Room Technique (Melton), wound-specific hypnotic intentions (Machenberg), reprogram-not-story (Kappas), memory reconsolidation (Nasir)
HypnoticWorld adapted: Affect bridge + body-location scan (FearOfAbandonment), mist metaphor (FearOfAbandonment), life path walk (FearOfAbandonment), movie screen dissociation fallback (InnerChild), "they always did their best" (InnerChild), critical voice identification + screen replacement (SelfCriticism), "knock on the door" post-hypnotic access (InnerChild)
Original TM-002: Flip Theory workshop/bricks callback, tribe circle/anchor compound, protector energy/rescuer-helper evidence chain

PHASE 1: CHECK-IN + JOURNAL REVIEW ~8 min

SAY: "Hey Tristan, good to see you. How are you doing tonight?"

DO: Let him settle. Match energy. Observe posture, eye contact, tone vs S3.

SAY: "I got your journal from Tuesday. Thank you for writing that. Before we get into tonight's work, I want to talk about what you wrote — because every word of it matters."

SAY: "First: you did the homework. You went to the group with a grounding intention. You adopted the listener-helper role. You offered support. And then you observed what happened inside you and wrote it down. That sequence — prepare, act, observe, report — most people cannot do that. You did all four."

SAY: "Second: you said the support part was easy. That is not a small thing. That means the behavioral tools are working at the surface. The anchor holds. The protector energy holds. The helper role feels natural. You are building bricks."

SAY: "But then you wrote two sentences that are the most important things you have said to me across four sessions. You wrote: 'I still find myself thinking that the people I care about don't actually care about me.' And: 'I have a hard time believing that I'm a good person.'"

DO: PAUSE. Let that land. Watch his face.

SAY: "Those two beliefs are the reason the surface tools are not enough. They work on the 12 percent — your conscious behavior. But these two beliefs live in the 88 percent. They were installed before you could question them. And tonight, we are going to the source of those beliefs and giving them a different ending."

ASK: "How are you feeling about doing the deeper work tonight? Any concerns?"

If nervous: "The part of you that is nervous is the same part that has been protecting you since childhood. It is doing its job. We are not going to fight it. We are going to show it something new."

RECORD: Mood: ___. Concerns: ___. Readiness: ___/10.

PHASE 2: SMART BASELINES — NON-NEGOTIABLE ~3 min

COLLECT THESE. No more deferrals.

SAY: "Quick baselines. Same six areas. Just how you feel right now."

ASK: "Self-esteem: 1 = no value, 10 = confident and worthy."

RECORD: SE: ___/10

ASK: "Assertiveness: 1 = cannot speak up, 10 = comfortably express needs."

RECORD: AS: ___/10

ASK: "Anxiety (inverted): 1 = runs the show, 10 = calm and in control."

RECORD: AX: ___/10

ASK: "Trust: 1 = guard always up, 10 = open with chosen people."

RECORD: TR: ___/10

ASK: "Comfort in own skin: 1 = deeply uncomfortable, 10 = at ease."

RECORD: CO: ___/10

ASK: "Influence of the past: 1 = controls everything, 10 = aware but free."

RECORD: PI: ___/10

RECORD: **BASELINES: SE___ AS___ AX___ TR___ CO___ PI___**

PHASE 3: PRE-TALK — BEACH BALL + WHAT WE ARE DOING TONIGHT ~5 min

SOURCE: Beach ball metaphor adapted from HypnoticWorld FearOfAbandonment. Rewritten for TM-002.

SAY: "Before we start, let me explain what is happening underneath the surface — because understanding the mechanism makes the work more effective."

SAY: "Imagine a beach ball in a pool. If you try to push it underwater, it bobs right back up. The harder you push, the more force it uses to return. That beach ball is the two beliefs you named in your journal. You have been pushing them down your whole life — through willpower, through psychotherapy, through the behavioral tools we have built together. And they keep bobbing back. Not because you are not trying hard enough. Because pushing them down is the wrong approach. What actually works is letting the air out."

SAY: "Tonight, we let the air out. Not by analyzing. Not by talking about the beliefs. By going to the moment they were inflated — when a child made the only conclusion available to him — and giving that child the information he did not have. The adult perspective. The truth. That is what deflates the ball. And once the air is out, it does not bob back up. Because there is nothing left to push down."

SAY: "Here is what it looks like. I guide you into a deeply relaxed state — same as Session 2, so it will feel familiar. From that state, your adult self meets a younger version of you. Not reliving anything. Observing. From your current strength, your current safety. And you get to speak to him. Give him what was missing. I will not tell you what to say. You already know."

SAY: "You are always in control. Right index finger at any point — I stop. Sound good?"

DO: Wait for confirmation. Address questions.

PHASE 4: RECORDING NOTICE ~1 min

START RECORDING NOW.

SAY: "We are about to move into the relaxation and therapeutic portion. I am starting the recording now. You signed the consent — you are comfortable?"

DO: Wait for verbal consent.

SAY: "This is a hypnotherapy session recording for T.M. Listen between sessions. Quiet place. Do not listen while driving. Close your eyes and follow my voice."

PHASE 5: INDUCTION (S2 CONSISTENCY) ~7 min

SAY: "If at any point you want to pause or stop, raise your right index finger. I will stop immediately. You are always in control."

SAY: "Get comfortable. Place your hand gently on your chest."

Wait. Let him settle.

SAY: "Repeat after me. Say it and mean it."

SAY: "I am great."

DO: Wait.

SAY: "I am a wonderful person."

DO: Wait.

SAY: "Everybody genuinely likes me."

DO: Wait.

SAY: "I am being loved."

DO: Wait.

SAY: "Find a spot on the wall. See your face — the best version. Pride. Bravery. Fulfillment. The face of the man who handled those angry visitors with calm. Store that image."

DO: PAUSE 5 sec.

SAY: "Three deep breaths. In through the nose. Hold. Release slowly. Let the breath carry tension out."

DO: Breathe with him. 3 cycles.

SAY: "Allow your eyes to close. Whenever they are ready."

Wait for natural closure.

SAY: "Deep Sleep."

PHS: "Each and every time I suggest the words Deep Sleep, for the purpose of hypnosis and with your permission, you will enter this state safely and comfortably, at your own pace, quickly, calmly, and deeply, and the body and mind will settle."

PHASE 6: DEEPENING + BODY AWARENESS ~7 min

SAY: "Five down to zero. Each number, deeper. Five. Settling. Safe. Four. Outside world quieter. Three. Body heavy. Mind calm. Twice as deep. Two. So deep. So safe. One. Deeper still. Zero. Deep Sleep. All the way down."

PHS: "Safely and comfortably, body and mind settled."

SAY: "One. Two. Three. Deep Sleep. Ten times deeper. Again. One. Two. Three. Deep Sleep. One hundred times deeper. Perfectly safe."

SAY: "Staircase. Ten steps. Warm, sunlit space at the bottom. Ten. Nine. Twice as deep. Eight. Seven. Six. Five. Halfway — warm light below. Four. Three. Twice as deep. Two. One. Step off. Warm. Bright. Safe."

PHS: "Deep Sleep. Even deeper. Safe. Comfortable. Ready."

SAY: "Warm wave of relaxation. Crown of your head. Forehead smooth. Eyes. Jaw — let it go loose. Neck. Shoulders — release any weight that was never yours to carry. It was never yours."

SAY: "Arms. Hands. Chest. Stomach — the part that tightens when you feel unsafe. You are safe here. Let it soften. Hips. Legs. Feet. Toes. Every cell relaxed."

SAY: "Any outside sound helps you go deeper. Only my voice matters. You are safe."

RECORD: Trance signs: ___

PHASE 6B: OBSERVER CANVAS — DESENSITIZE BEFORE CONTACT ~3 min

SOURCE: Observer Canvas technique from Gemini AI Mode 3-Phase Model. Desensitize active trigger charge BEFORE meeting the child. IMS gated.

DO NOT SKIP. Proceeding to inner child work while the abandonment feeling is at full intensity risks abreaction or shutdown. This phase brings it below 2/10 FIRST.

SAY: "In this deep state, I want you to imagine a safe, private screening room. You are sitting in the center, completely secure, completely protected. In front of you is a large screen. And on that screen, you can see a representation of those old, familiar feelings. The feeling of being separate. Unseen. Alone even in a room full of people."

SAY: "But notice where you are. You are sitting safely in the chair, watching the screen. The pain is on the screen. But the safety is in your chair. Breathe into that distance. Because you can observe it, you are larger than it."

DO: PAUSE 7 sec.

SAY: "Now you have the controls in your hand. Reach out and begin to drain the color from that screen. Turn the vivid hurting into a fading, gray, black-and-white photograph. Watch the edges soften. Push the screen further and further away. Smaller. Quieter. Until it becomes entirely manageable."

SAY: "Let any old thoughts — 'nobody cares,' 'not good enough' — turn into faint, pixelated text on that distant screen. Meaningless symbols that hold no power over the air you breathe right now in your chair."

DO: PAUSE 10 sec.

SAY: "When your subconscious mind has successfully shrunk that image and lowered the emotional weight below a 2 out of 10, allow your right index finger to float up automatically."

IMS GATE: Wait for finger lift. Do NOT proceed to the affect bridge until IMS confirms desensitization below 2/10. If no movement after 60 sec: "Take your time. Push the screen a little further. Drain a little more color. When it is below a 2, the finger will lift on its own."

RECORD: IMS desensitization confirmed: Y/N. Time: ___. Intensity before: ___/10. After: ___/10.

Observer Canvas complete. Active trigger charge reduced. Safe to proceed to affect bridge.

PHASE 7: AFFECT BRIDGE — BODY LOCATION OF ABANDONMENT

~4 min

SOURCE: Affect bridge technique adapted from HypnoticWorld FearOfAbandonment + Kappasinian body-location scan.

SAY: "In this deep state of relaxation, I want you to think about what you wrote in your journal. That feeling of being in the group on Tuesday — surrounded by people, but feeling alone. The thought: 'They do not really care about me.' Let that feeling come now. Not the thought. The feeling underneath it. Let it surface."

DO: PAUSE 10 sec. Watch body for tension indicators.

SAY: "Now notice where in your body that feeling lives. Some people feel it in the pit of the stomach. Others notice a tightness in the chest, or a constriction around the throat. Maybe it is heaviness in the shoulders or a hollowness behind the ribs. Wherever it is — notice it. Name the place."

DO: PAUSE 7 sec. He may speak aloud. If not: "When you find it, let a nod happen."

RECORD: Body location of abandonment: ___

SAY: "Good. That location in your body is where the belief lives. Not in your head. Not in your thoughts. In your body. That is why the thinking tools can catch it but cannot erase it. Because it is stored here — in the tissue, in the nervous system, in the cells that learned to brace for loss before you could speak."

SAY: "Now I want you to use that feeling — like a thread, like a compass — to travel back in time. The feeling knows where it came from. Trust it. Let it guide you back to the very first time you felt this way. The first time you felt alone when you should not have been alone. The first time you felt that the people who should be there were not there."

DO: PAUSE 15 sec. This is the affect bridge. He is traveling. Do NOT rush.

SAY: "You are safe here. Whatever happened, you survived. Your presence right now — in this room, in this chair, doing this work — is proof that you survived. Let the feeling guide you."

SOURCE: "Whatever happened to you, you survived" — adapted from HypnoticWorld FearOfAbandonment.

PHASE 8: THE MIST — ARRIVING AT THE INITIAL SENSITIZING EVENT

~3 min

SOURCE: Mist metaphor adapted from HypnoticWorld FearOfAbandonment. Rewritten for Emotional lane.

SAY: "You are arriving somewhere. A memory. A feeling. A moment. Perhaps you can see it clearly, or perhaps it appears as though you are surrounded by a dense layer of mist — a fog that has been sitting over this moment for years. You may feel alone in the mist, even though in reality there may have been others present. That is the feeling you have been carrying."

DO: PAUSE 10 sec.

SAY: "And now — something happens. From behind you, moving through the mist, comes your adult self. The person you are right now. Shoulders back. Heart steady. Arms open and pushing the mist apart. Not with force. With presence. The mist parts because the adult has arrived. And the adult is you."

SAY: "And there — as the mist clears — you see him. A younger version of you. A child. Your subconscious knows exactly how old he is. You do not need to choose. He is just there."

DO: PAUSE 10–15 sec. MOST IMPORTANT PAUSE. Let the image form naturally. Do NOT suggest age, setting, or emotion.

ASK: "What do you notice about him? How old does he look?"

DO: PAUSE. If he speaks: listen. Record exact words. If silent: "Take your time. He has been waiting."

RECORD: Child: age ___ appearance ___ posture ___ emotion ___ setting ___

PHASE 9: SAFE ROOM — BRINGING THE CHILD TO SAFETY ~3 min

Room must be NEW. Not grandfather's house. Not a foster home. Not the uncles' house. The adult builds it for the child.

SAY: "Now — you are not going to stay in his memory. You are going to take him somewhere new. Somewhere safe. A room that exists only in your mind. You are the architect. You build it around both of you right now."

SAY: "Notice the walls forming. The light — is it natural? Warm? The floor — what does it feel like under your feet? Is there a window? What sounds do you hear? What is the temperature?"

DO: PAUSE 7 sec. Let him build.

SAY: "This room is yours. You built it. Nothing enters without your permission. The child is here with you. Inside this room, both of you are safe. For the first time — safe in the same space."

SAY: "When the room feels solid and safe, let a nod happen."

DO: Wait for ideomotor nod.

RECORD: Room: ___. Nod: Y/N.

PHASE 10: UNDERSTANDING THE CHILD ~4 min

ASK: "Look at him now. In the safety of this room. What is he feeling? Can you tell?"

DO: PAUSE 10 sec. Let emotion surface. If tears: "That is okay. Let yourself feel it. You are safe. He is safe. I am right here."

IF ABREACTION: "Deep Sleep. Deeper. Feel the room. The walls. The floor. The temperature. Breathe. You are the adult. You are safe. He is safe. Take your time." Do NOT count out.

SAY: "This child — the one you are looking at right now — he made a decision a long time ago. Two decisions, actually. Made them with the only information he had. No adult explained what was really happening. No one sat him down and told him the truth. So he wrote his own explanations. And the only explanations a child can write are about himself."

SAY: "The first one: 'The people who should be here are not here. So I must not be worth being here for.'"

DO: PAUSE 5 sec.

SAY: "The second one: 'The people who are here are angry. So I must be causing it. Something about me is bad.'"

DO: PAUSE 5 sec.

SAY: "He has been carrying those two stories ever since. They are running right now. In your group on Tuesday. At work. In every relationship. Every time you feel alone in a crowd. Every time you call yourself a name you do not deserve. That is him. That is his stories, still playing. Not because they are true. Because nobody ever corrected them. Until tonight."

SOURCE: Inner child framing adapted from HypnoticWorld InnerChild: "Your inner child has always been a creative, curious and playful being with a desire to belong." Rewritten for TM-002's abandonment context.

SAY: "Because underneath those two stories, there is a child who was always creative, curious, and brave. A child with a deep desire to belong. A child who did his very best with what he had. He had *always* done his very best. And his very best was enough. It was always enough."

PHASE 10B: ACKNOWLEDGE THE PROTECTIVE PART

~2 min

SOURCE: Secondary gain acknowledgment from Gemini AI Mode. Validate the defense mechanism before asking it to stand down. Without this, the subconscious may resist reparenting.

SAY: "Before I speak to the child, I want to speak directly to the part of you that built the wall. The protective part. The part that decided, a long time ago, that it was safer to believe nobody cares than to be blindsided by another loss."

DO: PAUSE 5 sec.

SAY: "Thank you. I see how hard you have worked since childhood to keep this shield in place. Believing that you were not enough, believing that people would inevitably leave — that was the only way you knew how to prepare for the pain. It was your firewall. Your watchtower. And it kept you alive."

SAY: "But listen closely. The calendar has turned. The environment has completely changed. The child is no longer trapped in that early baseline. The adult self is standing right here — fully resourced, fully capable of protecting this system. Holding onto those old beliefs does not protect you anymore. It only keeps you isolated in a room full of people who actually care."

SAY: "I am asking the subconscious mind right now — look at the adult sitting in this chair. If you are ready to allow the adult to take over the job of protection — if you are ready to let that younger part step down from the watchtower and rest — let that right index finger float up, completely on its own, to signal your agreement."

DO: Wait for IMS finger lift. If immediate: subconscious is exhausted from maintaining the baseline — proceed. If delayed: "That is right. Taking all the time you need. Because your subconscious knows it must be absolutely certain of its safety before it updates a lifelong protocol."

RECORD: IMS agreement: Y/N. Time: ___. Immediate or delayed: ___

PHASE 11: REPARENTING — "NOBODY CARES ABOUT ME" ~8 min

SAY: "Move closer to him. Not all the way. Just close enough that he can see your face. That he can see who he becomes."

DO: PAUSE 5 sec.

SAY: "He is looking at you now. The child who believed nobody truly cares. Look at his face. Those eyes. That belief has been running in those eyes for years. Every time you sat in the group and felt alone — that was him. Every time someone showed you care and you could not let it in — that was his filter. Rejecting evidence. Because the story says: 'They do not really mean it.'"

DO: PAUSE 7 sec.

SAY: "From your adult perspective — from everything you know now, everything you have lived — what would you want to say to him? What does he need to hear that was never said?"

MOST IMPORTANT PAUSE. 20–30 sec minimum. Let HIS subconscious provide the words. Do NOT fill the silence. Do NOT suggest what to say. If 40 sec with nothing: "What does he need to hear? What was never said to him?" If still stuck: "It does not have to be words. It can be a feeling. Safety. Warmth. Presence. Just being there."

DO: PAUSE 20–30 sec. Record whatever he says VERBATIM.

RECORD: Client said to child re: abandonment (VERBATIM): ___

SAY: "He can hear you right now. He has been waiting to hear this. And now he is receiving it."

DO: PAUSE 10 sec.

SAY: "And here is what was true then and is true now. You were always worth staying for. The people who left did not leave because of you. Your mother was fighting a battle with addiction that consumed her. Your father was fighting the same war. Those battles were theirs — adult battles that a child should never have had to witness, let alone carry. Their absence was a reflection of what *they* were going through. Not a reflection of your value. Not for one second."

SAY: "The proof is right here. You survived. You grew. You show up every Tuesday for a group of men and offer them support — even when the wall is up, even when you feel alone, you show up. You pulled your friend from a river without thinking. You handled angry strangers at your job with more composure than most people develop in a lifetime. You are sitting in this room right now, going back to the child who was hurt, choosing to be the adult who heals him."

SAY: "*That is what someone who is worth caring about does.* And the people in your group on Tuesday? They are not performing care for your benefit. They are there because they chose to be. Just like you chose to be there for them. You wrote it yourself — 'it was easy to offer support.' That ease? That is evidence. Not of a technique. Of who you are."

DO: Wait for ideomotor nod: "When you feel that something has shifted, even slightly, let a nod happen." Wait up to 60 sec.

RECORD: Nod: Y/N. Time: ___. Emotional response: ___

PHS: "For the purpose of hypnosis and with your permission, safely and comfortably: the old belief 'nobody truly cares about me' loosens its grip. Not because someone told you to feel differently. Because your adult self showed the child the evidence. The evidence was always there. Now he can see it."

Reparenting #1 complete. Abandonment belief addressed with client's own words + life evidence.

PHASE 12: REPARENTING — "I AM NOT A GOOD PERSON" ~8 min

GATE: Only if Phase 11 landed and he has capacity. One deep reparenting is a strong session. Two is extraordinary. Skip to Phase 13 if at limit.

SAY: "There is one more thing the child is carrying. Look at him. You can see it. In his shoulders. In the way he holds himself small. Like he is trying not to take up space. Like taking up space was dangerous."

SAY: "The people who were supposed to take care of him — the ones in the house — they were angry. They yelled. They were rough. And no one ever explained why. No one ever sat him down and said: 'This is not about you.' So the child wrote his own explanation. And the only explanation available to a child in that position is: 'I must have caused this. Something about me makes people angry. I am not a good person.'"

DO: PAUSE 7 sec. Watch body. This may trigger deeper emotion.

SAY: "But you are the adult now. And from this room, looking at that child, you can see something he could not. Their anger was not about him. Three men who were handed a child they did not know how to raise. Men dealing with their own unresolved pain, their own frustrations, their own histories. And instead of asking for help, instead of learning, they did what broken adults do — they lashed out at whoever was smallest and closest. That was *their* failure. Their dysfunction. Not his fault. Not yours. Not for one moment."

SAY: "From your adult perspective — looking at that child carrying blame that was never his — what do you want to tell him?"

DO: PAUSE 20–30 sec. Let HIM find the words. RECORD VERBATIM.

RECORD: Client said to child re: uncle blame (VERBATIM): ___

SAY: "He is hearing you. And the weight — the weight of believing he caused their anger — is lifting. Not because you erased the past. Because you corrected the story. The real story. The one he was too young to write."

SOURCE: Adapted from HypnoticWorld InnerChild: "Reassure your inner child that you know they did their very best because you know it: they had always done their very best."

SAY: "He did his very best. A child navigating adults who could not manage themselves. A child who found his grandfather's house, who found his sister, who found friendships, who found the courage to sit in a therapy group at twenty-two and say 'I want to do better.' That child was never bad. That child was *brilliant*. And the adult he became is the proof."

DO: Wait for ideomotor nod. Up to 60 sec.

RECORD: Nod: Y/N. Emotional response: ___

PHS: "For the purpose of hypnosis and with your permission: the old story 'I am not a good person' is being rewritten. Not with affirmation. With evidence. Evidence from your own life. The story changes. The weight lifts."

PHASE 13: THE CRITICAL VOICE — WHOSE VOICE IS IT? ~5 min

GATE: Only if Phases 11-12 landed and time/capacity remain. If at limit, skip to Phase 14 (Life Path).

SOURCE: Critical voice identification + screen replacement adapted from HypnoticWorld SelfCriticism. Rewritten for TM-002's self-labeling pattern.

SAY: "Before we leave this room, there is one more thing. The voice. The one that says 'asshole' when you have a judgmental thought. The one that says 'not good enough' when you compare yourself to your peers. That voice has been running for a long time. Automatically. Without your permission."

SAY: "Listen to it now. Tune in for a moment. What does it sound like? At first it might sound like your own voice — because it has become part of your thinking. But if you listen closer, underneath, it will remind you of someone else. Someone from when you were smaller. Someone whose words got encoded before you could filter them."

DO: PAUSE 10 sec. Watch for recognition.

SAY: "When you know whose voice it reminds you of, let a nod happen."

DO: Wait for nod.

RECORD: Critical voice source: ___

SAY: "Now imagine a large screen in front of you. On that screen, you can see that person and you as a child. See the moment those words were first spoken. See how small you were. See how you received them — because you had no choice but to believe them."

DO: PAUSE 7 sec.

SAY: "But you are no longer a child who is easily influenced by others. You are a mature adult with a mind of your own. You can distinguish right from wrong. And you know that the criticism was wrong. Not because it was malicious. Because what you actually needed was encouragement. Guidance. Someone to say: 'You are doing fine. You are doing your best. And your best is enough.'"

SAY: "Now — phase out that critical person from the screen. Watch them fade. And replace them with the self-assured, confident, adult version of yourself. The one who handles angry visitors with calm. The one who offers support to his group. The one who is sitting in this room right now doing the bravest work of his life."

SAY: "Hear the words that should have been spoken — now being said by your adult self to your child self. Gently. Clearly. Words of encouragement. Words of truth. Turn up the screen. Make it brighter. Warmer. Fill it with the colors you chose for this room."

DO: PAUSE 10 sec.

SAY: "From this moment forward, when that old critical voice starts to speak — 'asshole,' 'not good enough,' 'nobody cares' — the screen changes. The old voice fades. And the adult voice replaces it. Not shouting over it. Simply being clearer. Truer. More current. The adult says: 'That was a reaction, not your identity. What is your next move?' The coach, not the critic."

PHS: "For the purpose of hypnosis and with your permission: the critical voice is identified. Its source is recognized. And the adult voice is installed alongside it — not to fight it, but to outgrow it. Each day the coach gets louder. Each day the critic gets quieter. Not forced. Outgrown."

PHASE 14: LIFE PATH WALK — HAND IN HAND THROUGH THE PAST ~4 min

SOURCE: Life path walk adapted from HypnoticWorld FearOfAbandonment. Rewritten for TM-002.

SAY: "Now take the child's hand. Your adult hand holding his smaller one. And together, step out of the room."

SAY: "You are on a path. Your life path. And as you walk forward, you pass through the experiences where the old fear lived. The moments where you felt abandoned. The moments where you felt blamed. They are there — on either side of the path — like old photographs."

SAY: "But this time, you are not alone in those photographs. You are walking through them with the child's hand in yours. And as you pass each one, you smile. Not because they were good. Because you survived them. Because the child survived them. And because they no longer have power over the path ahead."

DO: PAUSE 10 sec. Let him walk the path.

SAY: "Wave to those old experiences as you pass. Let them see that you survived. Let them see who the child became. They thought they could define you. They were wrong."

SAY: "And now — ahead of you on the path — something different. It is Tuesday night. Your group. The chairs in a circle. The faces of the men who show up every week. And this time, as you approach — with the child's hand in yours — something has changed. The glass wall is thinner. Maybe still there. But thinner. Because the child knows now. He knows he was always worth staying for. He knows the anger was not his fault. And knowing that — even a little — changes what the wall is protecting against."

DO: PAUSE 7 sec.

SAY: "You do not need to tear the wall down tonight. You just need to know it is no longer load-bearing. It is standing out of habit, not out of necessity. And habits can change."

PHASE 15: INTEGRATION — ADULT + CHILD ~4 min

Integration is OPTIONAL. Agency language. Client chooses the form: embrace, hand, words, presence, or simply acknowledgment.

SAY: "Look at the child now. Something has changed. In his face. In his posture. He heard you. He received what you gave him. The truth. The correction. The presence that was missing."

SAY: "And now you have a choice. You can stay side by side — walking the path together. Or you can move closer. Offer him whatever feels right. A hand on his shoulder. A look. A word. An embrace. Whatever your subconscious wants to give. There is no script. Only what feels true."

DO: PAUSE 20 sec. Let him choose. Record what happens.

RECORD: Integration: what happened ___

SAY: "Whatever just happened is real. That connection is a neural pathway. A new one. Created right now. And every time you remember this moment — every time you press your thumb and forefinger together — it gets stronger. The adult does not abandon the child. The adult stays. That is the correction. That is the ending the story never had."

SOURCE: Adapted from HypnoticWorld InnerChild: "From now on, you will be there for it — whenever your child may need you. All it needs to do is to knock on the door of your subconscious mind, and you will instantly be there."

SAY: "And from this moment forward, whenever the child needs you — whenever the old loneliness surfaces, whenever the old blame fires — all he needs to do is knock. And you will be there. Inside. Instantly. To calm, to comfort, to show the evidence. The door between you is always open now. He is no longer locked away. He is no longer alone."

PHS: "For the purpose of hypnosis and with your permission: the adult and the child are connected. The child is no longer alone. The adult does not abandon him. This integration deepens with each passing day. Sealed. Protected. Growing."

PHASE 16: COMPOUND ANCHOR + POST-HYPNOTIC + SEAL ~5 min

SAY: "Press your thumb and forefinger together. Right hand."

DO: PAUSE 3 sec.

SAY: "Feel everything. The tribe — all eleven members. The golden circle. The armor and the shield. The workshop with its five workbenches. The bricks you have been laying. And now — the child. Held. Safe. Corrected. No longer alone. The life path walked hand in hand. The critical voice replaced. The coach installed. *All of it.* In one press. One breath. One gesture that contains the work of four sessions. Layered. Braided. Compounded. Unbreakable."

DO: PAUSE 7 sec. Let the compound anchor encode.

SAY: "Release the fingers. Everything is stored."

SAY: **POST-HYPNOTIC:** "Between now and our next session, you will notice something. When the old belief tries to fire — 'nobody really cares,' 'I am not a good person' — something new will happen. Before the belief completes, the adult's voice will be there. Quietly. Not arguing. Just showing the evidence. Reminding the child what is actually true. And each time the old belief fires and meets the evidence, it weakens. A thread at a time. Until the child no longer needs the old story. Because the new one is stronger."

SAY: "And when you sit in your group next Tuesday — something will be different. Not dramatic. Quiet. A moment where the wall is thinner. A moment where you think: 'Maybe they do care. Maybe I am worth caring about.' Notice it. Do not dismiss it as coincidence. That is the reparenting doing its work. That is the child receiving what was always owed to him."

SAY: "And the old fears? Those can become like bubbles now. The kind a child blows in the yard. They float up, they catch the light, and then — pop. Gone. Not because you fought them. Because there is nothing left inside them. The air is out."

SOURCE: Bubble metaphor adapted from HypnoticWorld FearOfAbandonment.

SAY: **VENTING DREAM:** "In the early morning hours, your subconscious will process what happened tonight. Dreams may be vivid. Emotional. Different. That is not a problem. That is subconscious housecleaning. Let them do their work."

PHS: "For the purpose of hypnosis and with your permission, safely and comfortably: everything is sealed. The reparenting. The integration. The voice replacement. The evidence. The life path. The child held, no longer alone. The door always open. All of it. Sealed. Protected. Growing stronger with each day. Each esteemable act. Each moment of genuine presence. Each brick."

SAY: "The beach ball is deflated. The air is out. It does not bob back up. Because there is nothing left to push down."

PHASE 16B: MESH FILTER PHA — LEFT HAND FOR TUESDAY GROUP ~2 min

SOURCE: Mesh Filter Post-Hypnotic Anchor from Gemini AI Mode. Separate from RIGHT hand tribe anchor. LEFT hand = selective filter for group situations.

LEFT hand thumb + index finger = Mesh Filter (group/social). RIGHT hand thumb + forefinger = tribe/circle/child anchor (general). TWO separate anchors, TWO purposes.

SAY: "And now I want to give you one more tool. This one is specifically for Tuesday. Specifically for your group."

SAY: "When you take your seat in the circle this Tuesday, bring the thumb and index finger of your LEFT hand together tightly. And take one long, slow, deep breath."

SAY: "The very instant you press those fingers together and exhale, your subconscious mind will automatically deploy the Mesh Filter. This filter is perfectly engineered by your deeper mind. It acts as a selective barrier. It allows the warm, genuine human connection and your own support of others to flow freely — but it completely catches, stops, and dissolves any old, fading static that whispers 'they do not care' or 'I am alone.'"

SAY: "Every time you press those fingers on Tuesday, you will instantly feel rooted in your own internal baseline of safety. Separate from their perfection. Completely secure in your own worth. Fully present. Fully protected. The filter does the work. You just press and breathe."

PHS: "For the purpose of hypnosis and with your permission: the Mesh Filter is installed. LEFT hand, thumb and finger, one breath. Deployed automatically in group settings. Connection flows in. Old static dissolves. Sealed."

RECORD: Mesh Filter PHA installed: Y. LEFT hand anchor confirmed.

PHASE 17: COUNT OUT ~3 min

SAY: "Zero. Close the door to the subconscious. Seal in every positive suggestion. Block all negatives. Only the positive enters. Only the positive remains."

SAY: "One. Feel your body. The surface beneath you. Your feet. The temperature."

SAY: "Two. Fingers move. Toes wiggle. A stretch if your body wants it."

SAY: "Three. Halfway. Refreshed. Clear-headed. What you processed tonight is settled deep. Something is lighter."

SAY: "Four. More alert. Sounds. Light. Carrying something different. The child is with you. Not behind a wall. With you."

SAY: "Five. Eyes open. Wide awake. Fully alert. Welcome back."

STOP RECORDING.

DO: Give time. Smile. Water. Let him orient. This may be deeply emotional. Do NOT rush debrief.

PHASE 18: DEBRIEF ~7 min

ASK: "How do you feel?"

DO: Give time. Let him find words. Do NOT prompt.

ASK: "What stood out? What did you notice?"

ASK: "How old was the child? What did he look like?"

ASK: "What did you say to him? What happened when you said it?"

ASK: "The critical voice — did you recognize whose voice it was?"

ASK: "The two beliefs — 'nobody cares' and 'not a good person' — do they feel the same right now, or has something shifted?"

ASK: "The life path walk — what was it like to pass through those experiences holding his hand?"

If shift: "Good. That is the reparenting landing. It deepens over the next days." If nothing obvious: "Sometimes the shift happens after. Notice subtle changes over the next week." If very emotional: "What you did tonight was profound. Give yourself grace. The processing continues."

RECORD: Debrief: feeling ___ child age ___ what he said (both) ___ voice source ___ shifts ___ depth ___/10

PHASE 19: HOMEWORK + SAFETY + CLOSE ~5 min

SAY: "Seven things for the week."

SAY: "One. Listen to tonight's recording at least once. Quiet place. Eyes closed. Each listen deepens the reparenting. The neural pathway gets stronger every time."

SAY: "Two. Anchor daily. One press. One breath. It now contains the tribe, the circle, the workshop, the child, the life path, and the coach. Use it every morning and anytime you need it."

SAY: "Three. When the old beliefs fire — 'nobody cares' or 'not good enough' — pause. Read the label. Fact-check it. Replace it with the evidence. The coach does this automatically now. Your job is to notice when it happens and let it work."

SAY: "Four. Before sleep: visit the room you built tonight. See the child there. He is not alone anymore. You are there. Fall asleep in the room together."

SAY: "Five. At your next Tuesday group: just notice. Is the wall thinner? Is there a moment where you feel less alone? A moment where you think 'maybe they do care'? Do not force anything. Just observe. And if that moment comes — do not dismiss it. That is the child receiving what was owed to him."

SAY: "Six. If the critical voice speaks — notice whose voice it is. You identified the source tonight. When it speaks, you can now say: 'That is not my voice. That is an old recording. And I have a newer, truer one.'"

SAY: "Seven. On Tuesday, when you sit in your group — LEFT hand, thumb and index finger together, one deep breath. The Mesh Filter deploys. Connection flows in. Old static dissolves. You do not need to force openness. The filter does the work."

ASK: "Can you do those seven things?"

DO: Wait for verbal commitment.

SAY: **SAFETY:** "Inner child work can bring things to the surface over the next few days. Memories. Emotions. Dreams. That is normal processing — subconscious housecleaning. If anything feels overwhelming: anchor first. Physiological sigh — two quick inhales, one long exhale. Email me: jeeth@vrishihypno.com, 24-hour response. And if urgent: 988. 24/7. You are not alone. And after tonight — neither is the child."

SAY: "What you did tonight was the bravest thing in our work so far. You went through the mist. You found the child. You gave him the truth. You walked the path with him. You replaced the voice. You held his hand. That changes things. Not because I said so. Because you lived it."

SAY: "Thank you for trusting me with this, Tristan."

POST-SESSION THERAPIST CHECKLIST

IMMEDIATELY AFTER

RECORD: 1. SOAP notes (verbatim: what client said to child, BOTH beliefs, voice source): [ ]

RECORD: 2. SMART baselines: SE___ AS___ AX___ TR___ CO___ PI___: [ ]

RECORD: 3. Affect bridge: body location of abandonment = ___: [ ]
