DS-001: SESSION 6 FULL SCRIPT — GRADUATION + LONG-TERM INDEPENDENCE

DS-001 (Deepak S., 56) | Date: _____, 2026 | Zoom | SLEEP-004 | 76% Physical, Kinesthetic-dominant | **THERAPIST ONLY — DO NOT DISTRIBUTE**

SESSION OVERVIEW

[This is Session 6 — the FINAL session. S1: assessment + first induction. S2/S2b: full sleep installation (10 installations). S3: weight management pivot (5 weight installations). S4: food journal review + targeted deepening. S5: full reinforcement pass (all 12 installations) + self-hypnosis teach + future-pace + graduation readiness confirmed. THIS session: graduation check-in, final installation seal (permanent take-home recording), relapse prevention, graduation count-out, debrief, and handoff.]

SESSION PURPOSE: This is GRADUATION. The recording made during Step 2 is the client's PERMANENT take-home recording. Make it thorough, paced, and complete. This is the recording he listens to for the rest of his life. Relapse prevention in trance. Celebration. Handoff of tools. Independence.

STEP	TIME	WHAT	NOTES
1	10 min	Graduation check-in	Final 12 SMART baselines. Full comparison S1 → S3 → S5 → NOW. Client's own words.
2	15 min	Final induction + installation seal	**START RECORDING.** Full verbatim all 12 installations. Graduation suggestion. This is the PERMANENT recording.
3	10 min	Relapse prevention	In trance. Sleep disruption, eating disruption, consistency over perfection, tune-up offer.
4	5 min	Count out (final)	Graduation language. **STOP RECORDING.**
5	2 min	PHS verify (final)	Last timing comparison.
6	10 min	Final debrief	"How do you feel?" Most impactful moment. Testimonial prompt. Progress report.
7	5 min	Handoff	3 recordings, self-hypnosis card, graduation summary. Tune-up policy.
8	—	Post-session checklist + CCH log	Final SOAP, update JSON, close case.

PHYSICAL LANE REMINDER (76% Physical): Direct. Literal. Specific. "You ARE." "It IS." Power words: PERMANENT, HARDWIRED, AUTOMATIC, SEALED, LOCKED. This is the final session — every suggestion is spoken as FACT, not aspiration. Kinesthetic anchors: Depth Dial click, pillow contact, thumb-and-finger, fork weight, hand-on-chest. Full PHS after every major installation.

STEP 1: GRADUATION CHECK-IN (10 MIN, CONSCIOUS)

[Final SMART baselines. All 12 measures. Full comparison across all sessions. Let the client tell you what changed — in his own words. Celebrate everything.]

OPENING

"Deepak, welcome to your graduation session. This is Session 6. The last one."

"Before anything else, I asked you last time to think about what has changed. So tell me. In your own words. What is different now compared to when you walked in for Session 1?"

[Let him talk. Do not interrupt. This is his moment. RECORD his exact words — these may be used in the graduation summary.]

[RECORD: Client's own words on what changed: ___]

"Thank you for sharing that. I want to acknowledge something. You did the work. I guided. I installed. I suggested. But you did the homework. You kept the journal. You ran the ritual every night. You practiced the self-hypnosis. You showed up for every session. The change is yours."

FINAL SMART BASELINES — SLEEP

"Let me take the final baselines. Same scales. Last time."

"Morning restedness — 1 to 10? You started at 4."

[RECORD: Restedness: S1=4 → S5=___ → S6=___/10.]

"Sleep onset — minutes to fall asleep? Started at about 35."

[RECORD: Onset: S1=35 min → S5=___ → S6=___ min.]

"Night-waking?"

[RECORD: Night-wake: S1=frequent/hard → S5=___ → S6=___.]

"Daytime energy — 1 to 10?"

[RECORD: Energy: S1=low/fatigue → S5=___ → S6=___/10.]

"Sleep ceremony — effortless?"

[RECORD: Ceremony: S1=starting → S5=___ → S6=___.]

"Self-hypnosis confidence — 1 to 10?"

[RECORD: Self-hypnosis: S1=0 → S5=___ → S6=___/10.]

FINAL SMART BASELINES — WEIGHT

"Weight measures. Last time."

"Control over eating?"

[RECORD: Control: S3=___ → S5=___ → S6=___/10.]

"Hunger versus emotional awareness?"

[RECORD: Awareness: S3=___ → S5=___ → S6=___/10.]

"Stop at satisfied?"

[RECORD: Satisfied: S3=___ → S5=___ → S6=___/10.]

"Emotional eating frequency?"

[RECORD: Emotional: S3=___ → S5=___ → S6=___/10.]

"Late-night eating?"

[RECORD: Late-night: S3=___ → S5=___ → S6=___/10.]

"Confidence in eating change?"

[RECORD: Confidence: S3=___ → S5=___ → S6=___/10.]

FULL PROGRESS COMPARISON

"Let me put this in perspective."

"You came in with a 4 out of 10 morning restedness. Thirty-five-minute sleep onset. Frequent night-waking that was hard to recover from. Persistent fatigue through every day. No self-hypnosis experience. Your mind was like an engine that would not turn off, even during sleep."

Adapt the next paragraph to actual numbers from the baselines above.

"Now your restedness is [___]. Your onset is [___] minutes. Night-waking is [___]. Your energy is [___]. The ceremony is [effortless / automatic]. Your self-hypnosis confidence is [___] out of 10."

"On the weight side — your eating control went from [___] to [___]. Your awareness of emotional versus physical hunger went from [___] to [___]. Your ability to stop at satisfied went from [___] to [___]. Late-night eating from [___] to [___]."

"Deepak, that is a transformation. Not a marginal improvement. A transformation. And you did it in six sessions."

"I want you to remember these numbers. When you are three months from now, six months from now, a year from now, and you wonder whether the work we did was real — remember these numbers. They are real. They are measured. They are yours."

STEP 2: FINAL INDUCTION + INSTALLATION SEAL (15 MIN, TRANCE)

START RECORDING HERE. This is the client's PERMANENT take-home recording. Full verbatim on every installation. Delta-paced. Take your time. This recording will be listened to hundreds of times. Make it thorough, measured, and definitive.

PHS RE-ENTRY

"Close your eyes. Deep breath in. Fill your lungs completely. Hold it. And let it out. Let everything go."

"Raise your arm. Palm in front of your face. Stare at your middle finger. You can see the fingers beginning to separate. Wider. The hand is moving toward your forehead. Magnetic pull. Closer. Closer. When your hand touches your forehead and you give me a nod — Deep Sleep." [Snap.]

> **"Each and every time I suggest the words Deep Sleep to you, for the purpose of hypnosis and with your permission, you will enter this state of hypnosis very quickly, calmly, and deeply, and the physical body will relax."**

[TIME IT: PHS re-entry: ___ seconds. Final measurement.]

DEEPENER — FULL PROGRESSIVE RELAXATION

[This is the permanent recording. Use the FULL progressive, not the abbreviated version. Delta-paced. Slow. Deliberate. Physical lane: direct body commands.]

"Hand down. Resting in your lap or by your side."

"Five — going down now. Deeper than you have ever been."

"Four — releasing everything. Every thought. Every tension. Every concern."

"Three — deeper still. The body is heavy. The mind is quiet."

"Two — approaching delta. Half a hertz. The deepest state your brain can reach."

"One — delta territory."

"Zero — Deep Sleep." [Snap.]

> **"Each and every time I suggest the words Deep Sleep to you, for the purpose of hypnosis and with your permission, you will enter this state of hypnosis very quickly, calmly, and deeply, and the physical body will relax."**

"Open your eyes." [Wait 2 seconds.] "Deep Sleep." [Snap.] "Twice as deep."

> **Full PHS.**

"Open your eyes." [Wait 2 seconds.] "Deep Sleep." [Snap.] "Twice as deep."

> **Full PHS.**

"Now. A wave of complete relaxation begins at the very top of your head. Warm. Heavy. It moves down your forehead. The muscles of the forehead smooth out. Completely flat. No tension."

"Down to your eyes. The eyelids are heavy. So heavy they could not open if you tried. The muscles around the eyes release."

"Down to your jaw. The jaw drops open slightly. The teeth separate. The tongue rests on the floor of the mouth. Every muscle in the face is released."

"Down your neck. The muscles of the neck let go. The head is heavy on the pillow or the chair. Supported."

"The shoulders. They drop. An inch. Two inches. All the tension you carry in the shoulders — released. Gone. Falling away."

"Down your arms. Upper arms heavy. Elbows heavy. Forearms. Wrists. Hands. Fingers. Warmth spreading through every finger. The hands are heavy and warm."

"Down your chest. The breathing is slow. Deep. Rhythmic. The chest rises and falls without effort. The heart beats steady and slow."

"Down your stomach. The stomach softens. The muscles of the abdomen release. No holding. No guarding. Just softness."

"Down your hips. The large muscles of the hips let go. Down your thighs. Heavy. Down your knees. Down your calves. Down to your ankles. Down to your feet. The toes relax."

"Every single muscle in your entire body — from the top of your head to the tips of your toes — completely, totally, absolutely released. You are deeper than you have ever been. And you go deeper still with every breath."

DEPTH DIAL TO DELTA LOCK

"Find the Depth Dial. You know exactly where it is. Your right hand is on the brass dial. Feel the cold metal under your fingers. The engraved numbers."

"Turn it down. Surface — 8 hertz. Past shallow. Past medium. Past light. Past deep. All the way down to Delta Lock. Half a hertz. Click."

"Locked. The dial will not move. You are at the deepest level of trance. Delta Lock. Point five hertz. This is where the deepest healing happens."

FULL INSTALLATION SEAL — ALL 12 (VERBATIM)

> *[This is the PERMANENT recording. Every installation gets FULL verbatim treatment. Not abbreviated. Not summarized. Complete. Physical lane: direct, literal, sensory. This is what he listens to for life.]*

"Now I am going to seal every installation we have built. Permanently. These suggestions become part of your permanent operating system. They do not fade. They do not weaken. They grow stronger every time you hear this recording. Every time you sleep. Every time you use the self-hypnosis. They are permanent."

INSTALLATION 1: DEPTH DIAL.

"Find the Depth Dial. [Pause.] Feel the brass under your fingers. [Pause.] Turn it now. [Pause.] Surface at 8 hertz. The busy mind. [Pause.] Shallow at 6. Thoughts slowing. [Pause.] Medium at 4. The noise fading. [Pause.] Light at 2. Almost quiet. [Pause.] Deep at 1. Still. Heavy. [Pause.] And Delta Lock at 0.5. [Pause.] Click. [Pause.] Locked. [Long pause.] The deepest, most restorative frequency your brain can sustain. Locked for three hours of uninterrupted restoration."

"The Depth Dial is permanently installed. Your hand turns it and the brain follows. Instantly. No delay. No resistance. The dial is the command. The brain is the follower. This dial is yours for the rest of your life. You can access it any time, any place, with your eyes closed and three breaths. It is inside you. It goes where you go. Permanent."

INSTALLATION 2: SORTING ROOM.

"The Sorting Room. [Pause.] Warm. Quiet. Amber light. [Pause.] The librarians are at their stations. [Pause.] One files today's faces to the Face Gallery. Their face, their name, their conversation — cataloged and stored. [Pause.] Another carries new words to the Language Wing. Every word you heard, every email you read, every message you processed — filed and archived. [Pause.] A third maps routes in the Map Room. Every location you visited, every route you drove, every spatial relationship — mapped and stored. [Pause.] All of this happens silently. Below awareness. [Pause.] The librarians work best when you are deeply asleep."

"Three librarians work silently all night. They never rest. They never complain. They file the day's intake so your mind is clear for tomorrow. The backlog clears. The queue empties. By morning, the desk is clean."

INSTALLATION 3: SETTLING POND.

"The Settling Pond. [Pause.] Still water. Moonlight. [Pause.] The day's impressions settle like gold dust. [Pause.] You do not force anything. [Pause.] You stop stirring. [Pause.] Gravity does the work. [Pause.] The particles drift down. [Pause.] The water clears. [Pause.] The surface becomes glass-smooth."

"Every impression from the day — every conversation, every decision, every worry, every plan — they are like fine gold dust suspended in water. And as you breathe, as the Depth Dial locks, the particles settle. Slowly. Gently. They drift to the bottom. The water clears. The surface becomes perfectly transparent. By the time you reach Delta Lock, the pond is crystal clear. Still. Silent. Nothing floats. Nothing disturbs. The day has settled. The mind is clear."

INSTALLATION 4: ISLAND CABIN.

"The Island Cabin. [Pause.] Your permanent sleep sanctuary. [Pause.] Cedar and ocean air. [Pause.] The ceiling fan turning slowly. [Pause.] The weighted blanket pressing you into the mattress. [Pause.] Fifteen pounds of security. [Pause.] The waves match your breathing. Wave in, breath in. Wave out, breath out. [Pause.] Your throat is open. [Pause.] The muscles of your airway hold firm. [Pause.] Nasal breathing. Cool, clean, steady. [Pause.] The vagus nerve activates with every breath. [Pause.] Every cell regenerating."

"The Island Cabin stands on your private island. Cedar walls. The scent of cedar and ocean salt. A screen door lets the night breeze flow through. The weighted blanket presses you into the mattress with gentle, even pressure across your entire body. The temperature is perfect — sixty-seven degrees. The sound of ocean waves reaches you through the screen."

"In this cabin, the airway holds open. The throat muscles are firm and toned. The nasal passages are clear. You breathe through your nose — steadily, deeply, silently. No obstruction. No restriction. The air flows freely."

"In this cabin, cellular regeneration runs. The pituitary gland releases growth hormone. The glymphatic system flushes toxins from the brain. Every damaged cell is repaired. Every worn tissue is rebuilt. Every system is maintained. This happens every night. Automatically. The Island Cabin is your permanent healing sanctuary. It exists inside you. It is always there."

INSTALLATION 5: PILLOW TRIGGER.

"The Pillow Trigger. [Pause.] When your head touches the pillow, the Depth Dial turns to Delta Lock automatically. [Pause.] First 4-7-8 breath: the Sorting Room librarians begin. [Pause.] Second breath: the Settling Pond particles drift down. [Pause.] Third breath: the Island Cabin forms around you. [Pause.] Fourth breath: sleep. Delta. [Pause.] Three hours of uninterrupted deep restoration. [Pause.] The pillow IS the trigger. The body does the rest. [Pause.] Every night. Automatically. Without effort."

"When your head touches the pillow — any pillow, your pillow at home, a hotel pillow, any pillow anywhere in the world — the Depth Dial begins to turn. Automatically. Without thought. Without effort. Without decision."

"Your breathing shifts to 4-7-8. Four counts in through the nose. Seven counts hold. Eight counts out through the mouth. First breath: the dial passes shallow. Second breath: past medium. Third breath: past deep. Fourth exhale: click. Delta Lock. Half a hertz. Locked."

"Four breaths. That is all. Head on pillow. Four breaths. Delta Lock. Every night. Automatically. Permanently."

INSTALLATION 6: NIGHT-WAKING RESET.

"The Night-Waking Reset. [Pause.] If you wake for any reason. [Pause.] Hand on chest. [Pause.] Feel the warmth. [Pause.] One 4-7-8 breath. [Pause.] On the exhale, the Depth Dial resets to Delta Lock. [Pause.] The Settling Pond resets. [Pause.] Back to delta within 60 seconds. [Pause.] No phone. No clock. Hand. Breath. Dial. Delta."

"If you wake during the night — for any reason — the reset protocol activates. Your hand moves to your chest. You feel the warmth of your palm on your sternum. That contact is the signal. One 4-7-8 breath. One. That is all. The Depth Dial resets to Delta Lock. The Settling Pond stills. The Island Cabin wraps around you. Back to delta in sixty seconds. No analysis. No clock-checking. No planning. No worrying about how long you have been awake. Hand on chest. One breath. Delta. Sleep."

INSTALLATION 7: TIME ANCHOR.

"The 10:30 PM Time Anchor. [Pause.] Every night at 10:30, your nervous system begins the shutdown sequence automatically. [Pause.] The transition is smooth. [Pause.] Journal closed. Tension released. Breathing slowed. Dial turning. [Pause.] By 11:00, delta."

"You do not decide to get sleepy at ten-thirty. You do not force it. The body knows. The internal clock is set. Ten-thirty arrives and the parasympathetic system activates. Heart rate slows. Breathing deepens. Muscles soften. The journal is closed. The ritual is complete. The body knows it is time. Automatic. Every night. Ten-thirty."

INSTALLATION 8: VENTING DREAMS.

"Venting Dreams. [Pause.] Your dreams clear the processing backlog. [Pause.] Vivid dreams are proof the system is working. [Pause.] Each dream clears space. [Pause.] Each dream restores capacity. [Pause.] You remember your dreams. They are not problems. They are processing."

"The subconscious processes what the conscious mind could not finish during the day. Analysis. Prediction. Planning. Emotional clearing. Memory consolidation. Dreams vent the pressure. They clear the backlog. They empty the queue."

"When you have a vivid dream, the correct response is: good, the system is working. Let it run. It clears and quiets on its own. By morning, the processing is complete. The mind is fresh."

INSTALLATION 9: ENVIRONMENTAL SHIELD.

"The Environmental Shield. [Pause.] Temperature changes, fan noise, house sounds — absorbed. [Pause.] They do not reach the surface. [Pause.] The Delta Lock holds through all of it. [Pause.] Your body adjusts automatically. [Pause.] Absorb and continue. Not wake and alert."

"Once the Depth Dial is locked at delta, the environment cannot reach you. Sounds are absorbed. A car horn. A dog barking. A phone notification. The sound enters, the shield absorbs it, and delta holds. Temperature fluctuations are absorbed. A warm draft. A cool shift. The body adjusts automatically. Delta holds. Light changes are absorbed. A hallway light. A streetlight. The eyelids filter it. Delta holds. Nothing penetrates. The shield is active from Delta Lock to morning. Automatically."

INSTALLATION 10: EMOTIONAL PAUSE.

"The Emotional Pause. [Pause.] Every time you reach for food outside of genuine hunger — a pause activates. [Pause.] In that pause, you ask: am I hungry, or am I feeding something else? [Pause.] If hungry — eat. Enjoy it. [Pause.] If something else — press your thumb and finger. [Pause.] One 4-7-8 breath. [Pause.] The craving passes in 90 seconds. Every time. [Pause.] And during meals — when you have had enough — the pause activates again. [Pause.] Fork down. Satisfied. Not full. Satisfied."

"The pause is a circuit breaker between the impulse and the action. The impulse says: eat. The pause says: wait. One question rises — clear, direct, impossible to ignore: Am I hungry? Or am I feeding something else?"

"If the answer is hunger — genuine, physical, stomach-growling hunger — eat. Enjoy it. No guilt. No restriction. Fuel the machine."

"If the answer is something else — stress, boredom, habit, reward, tiredness, loneliness, celebration — the pause holds. Your thumb presses against your index finger. That pressure is the anchor. One 4-7-8 breath. The craving peaks at thirty seconds. It demands. It insists. But at sixty

seconds it weakens. At ninety seconds it dissolves. Every single time. The biology is predictable. Cravings have a ninety-second lifespan. Your breath outlasts them. The real answer is never food. The real answer is the breath."

INSTALLATION 11: PORTION AWARENESS / SIGNAL AMPLIFIER.

"The Satisfied Signal. [Pause.] Your stomach sends a clear signal when it has had enough. [Pause.] That signal is LOUD now. [Pause.] Unmistakable. [Pause.] When food reaches the point of enough, the signal fires. [Pause.] You hear it. You respond. [Pause.] The fork goes down. Not because you are told to. Because your body told you."

"Your stomach has a signal. It fires when enough fuel has arrived. Not excess. Not deficit. Enough. Satisfied. That signal is now loud. Clear. Unmistakable."

"When the signal fires, your hand puts down the fork. Automatically. Without debate. Without negotiation. Without 'just one more bite.' The signal IS the instruction. Fork down. Done. You are satisfied. The meal is complete."

"You eat with awareness. You taste each bite. You chew slowly. You give your body time to register. The dopamine comes from the quality of the experience, not the quantity. One aware bite equals ten autopilot bites. You eat less. You enjoy more. The fuel is premium."

INSTALLATION 12: WEIGHT-SLEEP POSITIVE SPIRAL.

"The Weight-Sleep Positive Spiral. [Pause.] Each pound released is a gift to your sleep. [Pause.] The airway opens wider. [Pause.] The breathing flows easier. [Pause.] The deep sleep deepens further. [Pause.] And each night of deep sleep normalizes your hunger hormones. [Pause.] Making tomorrow's eating decisions easier. [Pause.] The spiral accelerates. Every day. Every night."

"As the weight releases, the throat tissue reduces. The airway opens wider. The breathing eases. The snoring decreases. The oxygen flow increases. The deep sleep deepens. The brain reaches delta faster. Stays there longer."

"As the deep sleep deepens, cortisol normalizes. Ghrelin drops. Leptin rises. The hunger signals calibrate. You eat less without effort. The weight releases further. The spiral accelerates."

"Each pound released is a gift to your sleep. Each night of deeper sleep is a gift to your weight. The catch-22 is broken. The spiral is positive. It has been turning since Session 3. It accelerates from this point forward. Automatically."

GRADUATION SUGGESTION

"And now the final suggestion. The graduation seal."

"These patterns are permanent. They do not require my voice. They do not require sessions. They do not require recordings — although the recordings reinforce. They are hardwired into your 88 percent. They are part of the operating system. They run automatically."

"Every night. Every meal. Every day."

"The Depth Dial turns itself. The Pillow Trigger fires itself. The Emotional Pause activates itself. The satisfied signal fires itself. The Sorting Room runs itself. The Settling Pond clears itself. The Island Cabin heals itself. The shield holds itself."

"You are not working at this anymore. This is who you are. Your body IS a machine that sleeps deeply, eats wisely, and recovers fully. That is not a goal. That is not an aspiration. That is not something you are working toward. That IS who you are now. Right now. Today. Permanent."

"Subconscious mind, when every installation is permanently sealed and the graduation is complete, let a nod happen."

> *[Wait for nod. RECORD: Graduation seal nod: strong / weak / none. This should be the strongest nod of the entire program.]*

> **"Each and every time I suggest the words Deep Sleep to you, for the purpose of hypnosis and with your permission, you will enter this state of hypnosis very quickly, calmly, and deeply, and the physical body will relax."**

IDEAL SELF MERGE — FINAL INSTALLATION

> *[Technique inspired by future-self merge visualization. All wording is ORIGINAL. This calls back to the Future Self Visualization from S3 and completes the arc — the image is no longer future, it is present. Physical lane: direct, declarative, sensory. This is the final installation before relapse prevention.]*

"And now the final installation. [Pause.] The one that seals everything together. [Pause.]"

"Remember the future self you created in Session 3. [Pause.] That image of you — lighter, stronger, breathing clearly, sleeping deeply, eating with awareness. [Pause.] That image is no longer in the future. [Pause.] You have been walking toward it for weeks. [Pause.] And today, you arrive. [Pause.]"

"Step into that image one final time. [Pause.] Merge with it completely. [Pause.] Feel your body accept this as its permanent state. [Pause.] This is not who you are becoming. This is who you ARE. [Pause.]"

"Every installation, every dial, every pause, every trigger — they are hardwired now. [Pause.] They do not require my voice. They do not require sessions. They run automatically. [Pause.] You are the operator. You are the graduate. You are the new version. [Pause.]"

"The path you chose at the crossroads in Session 5 — you are on it. The Appetite Control Room dials from Session 4 — calibrated and locked. The pre-eating visualization — automatic. The Depth Dial — yours permanently. Every tool. Every anchor. Every installation. They live inside you now. They go where you go. [Pause.]"

"Subconscious mind, when the merge is complete and this IS who you are permanently, let a nod happen."

> *[Wait for nod. RECORD: Ideal Self Merge nod: strong / weak / none. This should be the deepest nod of the session, confirming total integration.]*

> **"Each and every time I suggest the words Deep Sleep to you, for the purpose of hypnosis and with your permission, you will enter this state of hypnosis very quickly, calmly, and deeply, and the physical body will relax."**

STEP 3: RELAPSE PREVENTION (10 MIN, IN TRANCE)

> *[Still in trance. Still recording. This section addresses the reality that life will test the installations. Physical lane: direct, no hedging. Acknowledge the challenge, then reinforce that the system holds.]*

SLEEP DISRUPTION SCENARIO

"Now I want to talk about the future. Because the future is not perfect. Life is not controlled."

"There may be nights when sleep is harder. You travel to a new city. The hotel bed is different. The pillow is wrong. The temperature is off. You are jet-lagged. You are stressed about a meeting or a project or a family situation."

"On those nights, the system does not break. It pauses. The installations are still there. The Depth Dial is still there. The Pillow Trigger is still there. They may be quieter on those nights. The onset may take seven minutes instead of three. The Night-Waking Reset may need two breaths instead of one. That is not failure. That is the system adapting to a harder environment."

"And when you return to your bed. Your pillow. Your room at sixty-seven degrees. Your ritual. The Pillow Trigger reactivates at full strength. The Depth Dial turns to Delta Lock in four breaths. The system restarts. Instantly. Because the installations are permanent. They are not dependent on location. They are not dependent on conditions. They are inside you."

"You might have one hard night after travel. Maybe two. By the third night, the system is fully back. This is normal. This is expected. This is not relapse. This is adaptation."

EATING DISRUPTION SCENARIO

"There may be days when eating is harder. A holiday. Thanksgiving. Diwali. A birthday celebration. A work dinner where food is endless and social pressure is high. Vacation, where routine disappears and indulgence is expected."

"On those days, the Emotional Pause is still there. It may be quieter. The voice asking 'hungry or feeding something else' may be softer in a loud room full of food and people. But it is there. And the anchor is there."

"Press your thumb and finger together. One breath. The pause returns. Even in the middle of a party. Even at a buffet. Even when someone says 'have more, have more.' The thumb and finger. One breath. The pause."

"And here is what matters: you do not need to be perfect. Not on those days. Not ever. If you eat more than you intended at a celebration — that is one meal. One. The next meal, the Emotional Pause fires at full strength. The Portion Awareness signal fires clearly. The system resets. One meal does not undo months of reprogramming. The 88 percent does not lose everything because of one meal. The system is robust. It recovers."

CONSISTENCY OVER PERFECTION

"You do not need to be perfect. You need to be consistent. Perfection is a trap. It is the 12 percent trying to control everything. Consistency is the 88 percent running the program day after day, night after night, even imperfectly."

"Consistent sleep ritual. Consistent Pillow Trigger. Consistent Emotional Pause. Consistent self-hypnosis practice. That is all. The system handles the rest."

"Consistency compounds. One good night builds on the last. One aware meal builds on the last. The spiral does not need perfection. It needs consistency. And you have proven over six sessions that you are consistent."

TUNE-UP OFFER

"And if you ever feel the installations weakening — if months from now the Pillow Trigger takes longer, or the Emotional Pause gets quieter, or the sleep onset creeps back up — one tune-up session can reset everything. One session. That is all it takes to bring every installation back to full strength. I am here if you ever need it."

"But here is what I believe: you will not need it. The self-hypnosis gives you the ability to reinforce your own installations every single day. You are the operator. The Depth Dial is yours. Two minutes, twice a day. That is your permanent tune-up."

STEP 4: COUNT OUT — FINAL (5 MIN)

> *[This is the GRADUATION count-out. Slower than usual. Each number carries weight. This is the last time you bring him out of trance as his therapist.]*

"Zero — sealing everything permanently. Every installation. Every suggestion. Every pattern. All systems locked and running. The Ideal Self Merge is complete — you ARE the version you imagined. The graduation is sealed. The operating system is updated. The firmware is permanent."

"One — slowly beginning to come up. Bringing all of this with you. Every installation. Every tool. Every anchor. They come with you into full waking consciousness."

"Two — physically aware now. Feel the weight of your body. The chair beneath you. The warmth in your hands. The breath in your lungs. Mentally alert. Clear. Focused."

"Three — coming up higher. Energy returning to every muscle. Feeling refreshed. Feeling light. Tonight, two systems run together. Tomorrow night. Every night. Forever."

"Four — eyes beginning to flutter. Almost there. When you open your eyes, you are a graduate. The program is complete. The tools are yours."

"Five — EYES OPEN. WIDE AWAKE. 1-2-3-4-5 eyes open, wide awake. You are a graduate of the VRishi Sleep and Weight Management program."

> **STOP RECORDING.**

STEP 5: PHS VERIFY — FINAL (2 MIN)

"Welcome back, Deepak. Take a moment."

> *[Give him 30 seconds to fully orient.]*

"One last PHS check. For the record. Raise your arm. Palm facing you. Middle finger. Breathe. Fingers separating. Hand toward face. When it touches — nod. Deep Sleep." [Snap.]

> *[TIME IT. RECORD: Final PHS verify: ___ sec. Compare to S1 first induction. Expected: under 6 seconds. This number IS the evidence of how deeply the PHS is installed.]*

"Count out: 1-2-3-4-5 eyes open, wide awake."

"That re-entry speed. Compare that to Session 1. That number alone tells you everything about how deeply this work has taken hold."

STEP 6: FINAL DEBRIEF (10 MIN, CONSCIOUS)

EMOTIONAL CHECK-IN

"How do you feel?"

> *[Let him answer fully. No rush. This is closure.]*

MOST IMPACTFUL MOMENT

"Across all six sessions — what was the most impactful moment for you? The moment where you felt something really shift?"

> *[RECORD: Most impactful moment (his words): ___]*

TESTIMONIAL PROMPT

"If someone you knew was considering hypnotherapy — a friend, a family member, a colleague — and they asked you what it was like, what would you tell them?"

[RECORD: Testimonial (his words): ___. Ask permission before using publicly.]

FINAL PROGRESS REPORT

"Let me read back your full progress. This is your graduation report."

Read the numbers from the baseline comparison table, S1 through S6, all 12 measures. Speak them clearly. Let the magnitude of change land.

MEASURE	S1 BASELINE	S3	S5	S6 FINAL
Morning restedness	4/10	—	___	___
Sleep onset	~35 min	—	___	___
Night-waking	Frequent/hard	—	___	___
Daytime energy	Low/fatigue	—	___	___
Ceremony compliance	Starting	—	___	___
Self-hypnosis confidence	0	—	___	___
Eating control	—	___	___	___
Hunger awareness	—	___	___	___
Stop at satisfied	—	___	___	___
Emotional eating freq	—	___	___	___
Late-night eating	—	___	___	___
Weight confidence	—	___	___	___

"Those numbers represent real, measurable change. You earned every one of them."

STEP 7: HANDOFF (5 MIN, CONSCIOUS)

RECORDINGS

"You have three recordings. I am going to send you today's recording — that is your permanent recording. It has every installation, full verbatim, sealed."

"You also have the Session 2b recording with the sleep installations, and the Session 3 recording with the weight installations."

"Rotate them. One per night in bed before the Pillow Trigger takes over. Listen to tonight's graduation recording first. It is the most comprehensive. After that, alternate. Any recording reinforces. They all work."

"Over time, you may find you do not need the recordings at all. The self-hypnosis replaces them. But they are always there if you want a boost."

SELF-HYPNOSIS PROTOCOL CARD

"I am going to send you a self-hypnosis protocol card. Five steps. Print it. Put it on your bedside table."

"Step one: sit or lie down, close eyes. Step two: three 4-7-8 breaths. Step three: Depth Dial — Surface to Delta Lock, click. Step four: one suggestion, three repetitions. Step five: count up 0 to 5, eyes open."

"Two minutes. Twice a day. Morning and bedtime. That is your permanent maintenance protocol."

GRADUATION SUMMARY

"I will also send you a graduation summary document. Your baselines, your progress, your installation list, your homework protocol. It is your reference."

TOOLS SUMMARY

"Let me name what you own now. Permanently."

"The Depth Dial. The Sorting Room. The Settling Pond. The Island Cabin. The Pillow Trigger. The Night-Waking Reset. The 10:30 Time Anchor. Venting Dreams. The Environmental Shield. The Emotional Pause. Portion Awareness. The Weight-Sleep Spiral."

"Plus the self-hypnosis protocol. Plus three recordings. Plus the sleep ritual. Plus the food journal practice."

"These are yours forever. They do not expire. They do not require renewal. They do not require me."

TUNE-UP POLICY

"One last thing. If you ever need a tune-up — months from now, a year from now, five years from now — one session can reset everything. Send me an email: jeeth@vrishihypno.com. We schedule one session. Sixty minutes. I reinforce whatever needs reinforcing. That is it."

"But I believe you will not need it. You have the self-hypnosis. You have the recordings. You are the operator."

CLOSE

"Deepak, it has been a privilege working with you. You came in with a mind that would not stop and a body that was fighting itself. You leave with a system that sleeps, a system that eats wisely, and the tools to maintain both for the rest of your life."

"Congratulations. You are a graduate."

STEP 8: POST-SESSION CHECKLIST + CCH LOG

[Complete within 30 minutes of session end. This is the FINAL session — close the case cleanly.]

ITEM	STATUS
PHS Timing (Final)	
PHS re-entry time (Step 2)	___ sec
PHS verify time (Step 5)	___ sec
S1 first induction time (for comparison)	___ sec
Installation Seal	
Graduation seal nod (all 12)	strong / weak / none
Ideal Self Merge nod	strong / weak / none
Final Sleep SMART (S1 → S6)	
1. Morning restedness	S1: 4/10 → S6: ___/10
2. Sleep onset	S1: ~35 min → S6: ___ min
3. Night-waking	S1: frequent/hard → S6: ___
4. Daytime energy	S1: low/fatigue → S6: ___/10
5. Ceremony compliance	S1: starting → S6: ___
6. Self-hypnosis confidence	S1: 0 → S6: ___/10
Final Weight SMART (S3 → S6)	
1. Eating control	S3: ___ → S6: ___/10
2. Hunger awareness	S3: ___ → S6: ___/10
3. Stop at satisfied	S3: ___ → S6: ___/10
4. Emotional eating freq	S3: ___ → S6: ___/10
5. Late-night eating	S3: ___ → S6: ___/10
6. Weight confidence	S3: ___ → S6: ___/10
Debrief	
Client's words on what changed
