SESSION 4 VERBATIM READOUT — INNER CHILD: ABANDONMENT + WORTHINESS

TM-002 (T.M., 22, 69% Emotional) | TRAUMA-001 | CSP Pro Bono | [DATE TBD] 6:00 PM PST | Zoom | ~90 min | **READ TOP TO BOTTOM — THERAPIST ONLY**

SESSION-WIDE RULES: Emotional lane: permissive, imagery, "you may notice." This is NOT regression. Adult views younger self in a NEW safe environment. Client discovers what to say — do NOT script re-parenting words. Agency language throughout. If abreaction: deepen trance, guide to safe space, do NOT count out abruptly. Exit signal = right index finger. Memory images may be symbolic — do NOT confirm or dismiss as factual. Record from Phase 5 onward.

JOURNAL ANALYSIS (Oct 28): Two core beliefs identified from T.M.'s MKP journal:
1. "People I care about don't actually care about me" — abandonment belief from absent parents. Feels alone even in company. The group "helped a little" but the subconscious belief persists.
2. "I'm not a good person" — internalized blame from uncle abuse. Self-worth deficit. Cannot accept that he deserves care.
Behavioral coping confirmed: Listener/helper role worked ("easy to offer support"). Protector energy held at work. Phase 1 = sufficient. Phase 2 (inner child) now indicated.

PHASE 1: CHECK-IN + JOURNAL REVIEW

~8 min

SAY: "Hey Tristan, good to see you. How are you doing tonight?"

DO: Let him settle. Match energy. Observe posture, eye contact vs. Session 3.

SAY: "I got your journal from Tuesday. Thank you for writing that. It told me exactly what I needed to plan tonight. Before we get into the work, I want to talk about what you wrote."

SAY: "You said the listener-helper role was easy and it helped a little with being less closed off. That is real progress. The fact that you could offer support and feel even a small shift — that means the behavioral tools are working at the surface. You are doing the work."

SAY: "But you also said something that matters more. You said you still find yourself thinking that the people you care about do not actually care about you. And that you have a hard time believing you are a good person. Even in the group, you feel alone."

DO: PAUSE. Let that land. Do not rush past it.

SAY: "That is the part the behavioral tools cannot reach. That is the programming — the message that got encoded when you were too young to question it. 'Nobody stays. Nobody truly cares. Something must be wrong with me.' That message is running underneath everything else. And tonight, we are going to go to the source of that message and give it a different ending."

ASK: "How are you feeling about doing the deeper work tonight? Any concerns? Anything you want to know before we start?"

DO: Address any concerns honestly. If he expresses doubt or fear: "That is completely normal. The part of you that is nervous is the same part that has been protecting you since childhood. It is doing its job. We are not going to fight it tonight. We are going to show it something new."

RECORD: Mood: ___. Concerns: ___. Readiness: ___/10.

PHASE 2: SMART BASELINES ~3 min

SAY: "Quick baselines. Same six areas, same scales. Just how you feel right now."

ASK: "Self-esteem: 1 = no value in who I am, 10 = confident and worthy."

RECORD: SE: ___/10

ASK: "Assertiveness: 1 = cannot speak up, 10 = comfortably express needs."

RECORD: AS: ___/10

ASK: "Anxiety (inverted): 1 = anxiety runs the show, 10 = calm and in control."

RECORD: AX: ___/10

ASK: "Trust: 1 = guard always up, 10 = open with chosen people."

RECORD: TR: ___/10

ASK: "Comfort in own skin: 1 = deeply uncomfortable, 10 = at ease."

RECORD: CO: ___/10

ASK: "Influence of the past: 1 = past controls everything, 10 = aware but free."

RECORD: PI: ___/10

RECORD: **BASELINES: SE___ AS___ AX___ TR___ CO___ PI___**

PHASE 3: PRE-TALK — WHAT WE ARE DOING TONIGHT ~5 min

SAY: "Tonight is different from our previous sessions. In Session 2 we built the tribe circle and the anchor. In Session 3 we mapped the territory. Tonight we go to the source."

SAY: "Here is what is going to happen. I am going to guide you into a deeply relaxed state — same techniques as Session 2, so it will feel familiar. From that deep state, you are going to see a younger version of yourself. Not reliving the past. Observing it. From your adult perspective. From adult safety."

SAY: "That younger version of you is the one who encoded the two beliefs you wrote about in your journal. 'Nobody really cares about me' and 'I am not a good person.' He encoded them because at that age, with those circumstances, they were the only explanations that made sense. If the adults who should have been there were not there, the child concludes: 'I am not worth being there for.' If the adults who should have been safe were angry, the child concludes: 'I must have caused this.'"

SAY: "Those conclusions were not true then and they are not true now. But they got locked in before you could question them. Tonight, your adult self — the one who handled those angry visitors with calm and dignity, the one who pulled his friend from the river, the one who shows up to a group every Tuesday and offers support even when it is hard — that adult gets to speak to the child. And give him what was missing."

SAY: "I am not going to tell you what to say. Your subconscious already knows. I am just going to put you in the right place and let you find it."

SAY: "You are always in control. Right index finger at any point — I stop immediately. Sound good?"

DO: Wait for verbal confirmation.

PHASE 4: RECORDING NOTICE ~1 min

START RECORDING NOW.

SAY: "We are about to move into the relaxation and therapeutic portion. I am starting the recording now. You signed the consent — you are comfortable with me recording this portion?"

DO: Wait for verbal consent.

SAY: "This is a hypnotherapy session recording for T.M. You can listen to this between sessions. Find a quiet place. Do not listen while driving. Close your eyes and follow my voice."

PHASE 5: INDUCTION (SAME AS S2 — CONSISTENCY) ~7 min

SAY: "If at any point you want to pause or stop, raise your right index finger. That is your signal. I will stop immediately. You are always in control."

SAY: "Get comfortable. Place your hand gently on your chest."

Wait. Let him settle.

SAY: "Repeat after me. Say it and mean it."

SAY: "I am great."

DO: Wait for repeat.

SAY: "I am a wonderful person."

DO: Wait for repeat.

SAY: "Everybody genuinely likes me."

DO: Wait for repeat.

SAY: "I am being loved."

DO: Wait for repeat.

SAY: "Find a spot on the wall. See your own face — the best version. Pride. Bravery. Fulfillment. Store that image."

DO: PAUSE 5 sec.

SAY: "Three deep breaths. In through the nose. Hold. Release slowly. Let the breath carry tension out."

DO: Breathe with him. 3 cycles.

SAY: "Second breath. In. Hold. Release. Shoulders drop. Jaw softens."

SAY: "Third breath. Deepest one. In. Hold. Release everything."

SAY: "Allow your eyes to close. Whenever they are ready. No rush."

Wait for natural eye closure.

SAY: "Deep Sleep."

PHS: "Each and every time I suggest the words Deep Sleep, for the purpose of hypnosis and with your permission, you will enter this state safely and comfortably, at your own pace, quickly, calmly, and deeply, and the body and mind will settle."

PHASE 6: DEEPENING ~6 min

SAY: "Five down to zero. Each number, deeper."

SAY: "Five. Settling. Safe. Four. Outside world quieter. Three. Body heavy. Mind calm. Twice as deep. Two. So deep. So safe. One. Deeper still. Zero. Deep Sleep. All the way down."

PHS: "For the purpose of hypnosis and with your permission, safely and comfortably, the body and mind are settled."

SAY: "One. Two. Three. Deep Sleep. Ten times deeper. Again. One. Two. Three. Deep Sleep. One hundred times deeper. Perfectly safe."

SAY: "Staircase. Ten steps down. Warm, sunlit space at the bottom. Ten. Nine. Twice as deep. Eight. Seven. Twice as deep. Six. Five. Halfway — you can see it. Warm. Bright. Four. Three. Twice as deep. Two. One. Step off into that space. Warm. Safe."

PHS: "Deep Sleep. Even deeper. Safe. Comfortable. Ready."

SAY: "Warm wave of relaxation. Crown to toes. Forehead smooth. Jaw loose. Shoulders — release any weight that was never yours to carry. Chest. Stomach — you are safe here. Hips. Legs. Feet. Every cell relaxed."

SAY: "Any outside sound will only help you go deeper. Only my voice matters. You are safe."

RECORD: Trance signs: ___

PHASE 7: SAFE ROOM — THE MEETING PLACE ~4 min

Room must be NEW. Not from his childhood. Not his grandfather's house. Not a foster home. Completely new. He is the architect.

SAY: "In this deep state, I want you to build a room. A room that exists only in your mind. Not from your past. Not from any place you have been. Completely new. You are the architect. You decide everything about it."

SAY: "What is the size? Is it large and open, or small and cozy? What are the walls made of? Is there a window? What do you see through it?"

DO: PAUSE 7–10 sec. Let him build it. Do NOT describe it for him. Emotional lane = he discovers.

SAY: "What is the light like? Natural? Warm? What sounds do you hear? What does it smell like? What is the temperature?"

DO: PAUSE 5–7 sec.

SAY: "Is there furniture? A place to sit? A place where you feel comfortable and safe?"

DO: PAUSE 5 sec.

SAY: "This room is yours. You built it. You decide what enters and what stays outside. Nothing comes in without your permission."

SAY: "When you feel settled in the room — when it feels real and safe — let a nod happen."

DO: Wait for ideomotor nod. Do NOT proceed without it.

RECORD: Room: size ___ walls ___ light ___ sounds ___ furniture ___. Nod: Y/N.

PHASE 8: MEET THE YOUNGER SELF

~5 min

MOST IMPORTANT MOMENT. Adult observes child. Do NOT rush. Let the subconscious provide the image. Do NOT suggest age, setting, or emotion. Agency language. If abreaction: deepen, guide to room safety, breathe.

SAY: "From inside your room, you notice something. In the corner, or by the window, or just appearing in the space — there is a younger version of you. A child. Your subconscious knows exactly how old he is. You do not need to choose. He is just there."

DO: PAUSE 10–15 sec. This is the most important pause. Let the image form naturally.

ASK: "What do you notice about him? How old does he look?"

DO: PAUSE. If he speaks: listen. Record exact words. If silent: that is fine. "Take your time. He has been waiting."

RECORD: Child: age ___ appearance ___ posture ___ emotion ___

ASK: "What is he feeling? Can you tell?"

DO: PAUSE 10 sec. Let emotion surface. If tears or emotional response: "That is okay. Let yourself feel it. You are safe in your room. I am right here."

IF ABREACTION: "Deep Sleep. Deeper. You are in your room. Feel the walls. The floor. The temperature. Breathe. You are the adult. You are safe. He is safe. Take your time." Ground with room sensory details. Do NOT count out.

SAY: "Look at him. Really look. This is the version of you that made a decision a long time ago. A decision he did not have the information to make correctly. He decided: 'Nobody stays. Nobody truly cares about me. Something must be wrong with me.'"

SAY: "He made that decision because at that age, with what he had to work with, it was the only thing that made sense. If the people who were supposed to be there were not there, the only explanation a child can reach is: 'I was not worth staying for.' If the people who were supposed to be safe were angry, the only explanation is: 'I caused this.'"

DO: PAUSE 7 sec. Let the reframe land.

SAY: "But you are not that child anymore. You are the adult who sees it clearly now. The adults who left — that was their limitation, not your worth. The adults who were angry — that was their dysfunction, not your fault. He could not know that then. But you know it now."

PHASE 9: RE-PARENTING — "NOBODY CARES ABOUT ME" ~8 min

SAY: "I want you to move closer to him. Not all the way. Just close enough that he can see your face. That he can see who he becomes."

DO: PAUSE 5 sec.

SAY: "He is looking at you now. The child who believed nobody truly cares. Look at his face. Look at his eyes. That belief has been running ever since. Every time you sat in the group and felt alone even when surrounded by people — that was him. That was his conclusion, still playing. Not because it is true. Because nobody ever corrected it."

DO: PAUSE 7 sec.

SAY: "From your adult perspective — from everything you know now — what would you want to say to him?"

MOST IMPORTANT PAUSE. 15–20 sec minimum. Let HIS subconscious provide the words. Do NOT fill the silence. Do NOT suggest what to say. If he struggles after 30 sec: "What does he need to hear? What was never said?" If still stuck: "It does not have to be words. It can be a feeling. Safety. Warmth. Presence."

DO: PAUSE 15–20 sec. Record whatever he says verbatim.

RECORD: Client said to child (verbatim): ___

SAY: "That younger version can hear you right now. He has been waiting to hear this. And now he is receiving it."

DO: PAUSE 10 sec. Let it land.

SAY: "And here is what was true then and is true now: you were always worth staying for. The people who left did not leave because of you. They left because of their own battles — battles a child should never have had to witness, let alone carry. Their absence was a reflection of what they were going through. Not a reflection of your value. Not for one second."

SAY: "The proof is right here. You survived. You grew. You show up every Tuesday for a group of men and offer them support. You pulled your friend from a river without thinking. You handle angry strangers with calm and dignity. You are in this room right now doing the hardest work there is — going back to the child who was hurt and choosing to be the adult who heals him. *That is what someone who is worth caring about does.*"

DO: Wait for ideomotor nod: "When you feel that something has shifted, even slightly, let a nod happen." Wait up to 60 sec.

RECORD: Nod: Y/N. Time: ___. Emotional response: ___

PHS: "For the purpose of hypnosis and with your permission, safely and comfortably: from this moment forward, the old belief 'nobody truly cares about me' loosens its grip. Not because someone told you to feel differently. Because the adult in you has shown the child the evidence. The evidence was always there. Now he can see it."

PHASE 10: RE-PARENTING — "I AM NOT A GOOD PERSON" ~8 min

GATE: Only proceed if Phase 9 landed and he has emotional capacity. If at limit, skip to Phase 11 (Integration). One deep reparenting is a strong session.

SAY: "There is one more thing the child is carrying. A heavier weight. Look at him. You can see it in his shoulders. In the way he holds himself."

SAY: "The people who were supposed to take care of him — the ones in the house — they were angry. They yelled. They were rough. And he was a child. So he did what children do. He looked at himself and said: 'I must have caused this. Something about me makes people angry. I am not a good person.'"

DO: PAUSE 7 sec. Watch body. This may be the deeper trigger.

SAY: "That was the only logic available to a child in that situation. If the adults are angry and no one explains why, the child writes the explanation himself. And the only story a child can write is: 'It must be me.'"

SAY: "But you are the adult now. And from this perspective, you can see something the child could not. Their anger was not about him. Their anger was about their own lives, their own frustrations, their own unprocessed pain. They were handed a child they were not equipped to raise. And instead of asking for help, they lashed out. That was *their* failure. Not his. Not yours. Not for one moment."

DO: PAUSE 10 sec.

SAY: "From your adult perspective — looking at that child carrying the weight of blame that was never his — what do you want to tell him?"

DO: PAUSE 15–20 sec. Let HIM find the words. Record verbatim.

RECORD: Client said to child re: uncle blame (verbatim): ___

SAY: "He is hearing you. And something is shifting. The weight he has been carrying — the weight of believing he caused their anger — that weight is not his. It never was. And right now, in this room, you are lifting it off his shoulders. Not because you are erasing the past. Because you are correcting the story. The real story. The one he could not write at that age."

SAY: "A person who was not good would not be in this room. A person who was not good would not pull a friend from a river. Would not offer support to strangers in a group. Would not handle anger with calm. Would not do the work you are doing right now. The evidence of your goodness is in the actions. Not in the label the child wrote on himself. The label was wrong."

DO: Wait for ideomotor nod. Up to 60 sec.

RECORD: Nod: Y/N. Emotional response: ___

PHS: "For the purpose of hypnosis and with your permission: the old story 'I am not a good person' is being rewritten. Not with affirmation. With evidence. Evidence from your own life. Evidence that the child can now see through the adult's eyes. The story changes. The weight lifts. Not all at once. But the process is underway. And it is irreversible."

PHASE 11: INTEGRATION — ADULT + CHILD

~4 min

Integration is OPTIONAL. Agency language. Client chooses whether to merge, embrace, walk together, or simply acknowledge. Do NOT force a hug or merging image.

SAY: "Look at the child now. Something has changed. In his face. In his posture. He heard you. He received what you gave him. The words. The truth. The correction."

SAY: "And now you have a choice. You can stay separate — the adult here, the child there. Or you can move closer. You can offer him whatever feels right. A hand. A look. A word. An embrace. Whatever your subconscious wants to give him. There is no script. There is only what feels true right now."

DO: PAUSE 15–20 sec. Let him choose. Record what happens.

RECORD: Integration: what happened ___

SAY: "Whatever just happened — that is real. That connection between the adult and the child is not imaginary. It is a neural pathway. A new one. It was just created. And every time you remember this moment, it gets stronger. The adult does not abandon the child. The adult stays."

SAY: "From this moment forward, you carry both. The child's sensitivity, his capacity for feeling, his need for connection — those are gifts. And the adult's strength, his evidence, his ability to see the truth — that is the protection the child always needed and never had. Both exist in you. Together. Not at war. Integrated."

PHS: "For the purpose of hypnosis and with your permission, safely and comfortably: the adult and the child are connected. The child is no longer alone. The adult does not abandon him. This integration deepens with each passing day. Sealed. Protected. Growing."

PHASE 12: COMPOUND ANCHOR + POST-HYPNOTIC

~4 min

SAY: "Press your thumb and forefinger together. Right hand."

DO: PAUSE 3 sec.

SAY: "Feel everything. The tribe. The circle. The armor. The workshop. And now — the child. Held. Safe. Corrected. No longer alone. All of it. In one press. One breath. One gesture that contains four sessions of work. Layered. Braided. Unbreakable."

DO: PAUSE 5–7 sec.

SAY: "Release the fingers. The anchor is compounded. Everything is stored."

SAY: **POST-HYPNOTIC:** "Between now and our next session, you will notice something. When the old belief tries to fire — 'nobody really cares,' 'I am not a good person' — something new will happen. Before the belief completes, the adult's voice will be there. Quietly. Not arguing. Just showing the evidence. Reminding the child what is actually true. And each time the old belief fires and meets the evidence, it weakens. A little more every time. Until the child no longer needs the old story. Because the new one is stronger."

SAY: "And when you sit in your group on Tuesday, you may notice something different. Not a dramatic shift. Something quiet. A moment where you feel less alone. A moment where the wall is a little lower. A moment where you think: 'Maybe they do care.' Notice it. Do not dismiss it. That is the integration doing its work."

SAY: **VENTING DREAM:** "In the early morning hours, your subconscious will process what happened tonight. Dreams may be vivid. Emotional. Different. That is normal. Let them do their work."

PHS: "For the purpose of hypnosis and with your permission, everything is sealed. The reparenting. The integration. The evidence. The anchor. All of it. Sealed. Protected. Growing stronger with each day. Each esteemable act. Each moment of presence."

PHASE 13: COUNT OUT

~3 min

SAY: "Zero. Close the door to the subconscious. Seal in every positive suggestion. Block all negatives. Only the positive enters. Only the positive remains."

SAY: "One. Feel your body. The surface beneath you. Your feet. The temperature."

SAY: "Two. Fingers move. Toes wiggle. A stretch if your body wants it."

SAY: "Three. Halfway. Refreshed. Clear-headed. What you processed tonight is settled deep."

SAY: "Four. More alert. Sounds. Light. Carrying something different tonight. Something lighter."

SAY: "Five. Eyes open. Wide awake. Fully alert. Welcome back."

STOP RECORDING.

DO: Give time. Smile. Water. Let him orient. This may be emotional. Do NOT rush debrief.

PHASE 14: DEBRIEF

~7 min

ASK: "How do you feel?"

DO: Give time. Let him find words. Do NOT prompt with specific emotions.

ASK: "What did you notice? What stood out?"

ASK: "How old was the child? What did he look like?"

ASK: "What did you say to him? What happened when you said it?"

ASK: "The two beliefs — 'nobody cares' and 'not a good person' — do they feel the same as before, or has something shifted?"

If shift: "Good. That is the reparenting landing." If nothing obvious: "Sometimes the shift happens over the next few days. Notice subtle changes." If more emotional than expected: "What you did tonight was profound. Give yourself grace. The processing continues."

RECORD: Debrief: feeling ___ child age ___ what he said ___ shifts ___ depth ___/10

PHASE 15: HOMEWORK + SAFETY + CLOSE ~5 min

SAY: "Five things for the week."

SAY: "One. Listen to tonight's recording at least once. Quiet place. Eyes closed. The reparenting deepens every listen."

SAY: "Two. Anchor daily. It now contains the tribe, the circle, the workshop, and the child. One press. One breath."

SAY: "Three. When the old beliefs fire — 'nobody cares' or 'not a good person' — pause. Read the label. Fact-check it. Replace it with the evidence. Use the toolkit template if you need structure."

SAY: "Four. Before sleep: visit the room. See the child. He is not alone anymore. You are there. Fall asleep in the room together."

SAY: "Five. At your next Tuesday group: just notice. Is the wall a little lower? Is there a moment where you feel less alone? Do not force anything. Just observe."

ASK: "Can you do those five things?"

DO: Wait for verbal commitment.

SAY: **SAFETY:** "Inner child work can bring things to the surface over the next few days. Memories. Emotions. Dreams. That is normal processing. If anything feels overwhelming — anchor first. Physiological sigh. Email me. And if urgent: 988. 24/7. You are not alone. And after tonight, neither is the child."

SAY: "What you did tonight was the bravest thing in our work so far. You went back to the child who was hurt and you gave him what was missing. That changes things. Not because I said so. Because you lived it. Thank you for trusting me with this, Tristan."

POST-SESSION THERAPIST CHECKLIST IMMEDIATELY AFTER
